

McAfee VirusScan Enterprise

**Complete
Endpoint Security**

McAfee VirusScan Enterprise proactively stops and removes threats, extends coverage for new security risks, and reduces the cost of managing responses.

- Protect your files from viruses, worms, rootkits, Trojans, and other threats
- Proactive protection against new and unknown buffer-overflow exploits that target vulnerabilities in Microsoft applications
- Easily configure policies to manage and remove quarantined items
- Supports users who are using both Microsoft Outlook and Lotus Notes
- Supports Windows desktop OS (Vista, 7, 8) and Windows Server OS (2000, 2003, 2008, 2012)

- ***Unbeatable malware detection and removal***
- ***Proactive protection from zero-day attacks***
- ***Integrates with McAfee GTI for real-time defense***
- ***Managed by ePO for deployment, configuration, enforcement and reporting***
- ***Optimized for fast performance and reduced system impact***
