Allergic Rhinitis

#### **Evaluating the Child With a Limp**

Nailah Adams Morancie, Margaret R. Helton

Pain is the presenting feature in about 80% of cases of a limp in children. Characteristics of pain and other key features elicited from history can narrow the broad differential diagnosis.

Radiography is the most common imaging modality in the evaluation of a limping child.

### **Disability Evaluations: Common Questions and Answers**

Ann E. Evensen, Jeff Hartman

Family physicians are often asked to evaluate patients with disabling conditions that can impact insurance benefits, employment, and the ability to access needed accommodations. A stepwise approach is recommended to ensure a comprehensive disability evaluation that addresses...

#### **Acute Shoulder Injuries in Adults**

Lauren Meryl Simon, Van Nguyen, Ngozi Margarete Ezinwa

The initial approach to acute shoulder injuries starts with a comprehensive history to understand the mechanism of injury and a complete shoulder examination, followed by imaging when indicated. Treatment can include surgical intervention or nonsurgical management.

Shoulder Disorders

#### **Dizziness: Evaluation and Management**

Tyler S. Rogers, Mary Alice Noel, Benjamin Garcia

Dizziness is a common but often diagnostically difficult condition. Clinicians should focus on the timing of the events and triggers of dizziness to develop a differential diagnosis because it is difficult for patients to provide quality reports of their symptoms.

Dizziness and Vertigo

## Neonatal Hyperbilirubinemia: Evaluation and Treatment

Emma J. Par, Chase A. Hughes, Pierce DeRico

More than two-thirds of infants develop jaundice, the clinical manifestation of hyperbilirubinemia. Most cases are physiologic and benign. All newborns should be examined regularly, and bilirubin levels should be measured in those who appear jaundiced. Bilirubin levels...

# Population-Based Monitoring of SARS-CoV-2/COVID-19 and Beyond

The May issue of *AJPH* focuses on population-based monitoring of COVID-19.

It features a special section that explores the value of population-based information based on random samples through the ENE-COVID study in Spain as well as the REACT-1 study in the United Kingdom.

Other papers in this issue address topics such as reducing health impacts of extreme heat, identifying loopholes for underage access in e-cigarette delivery laws, vaccinating vulnerable populations for COVID-19, and more.

The American Journal of Public Health (AJPH) is dedicated to the publication of original work in research, research methods, and program evaluation in the field of public health. The mission of the journal is to advance public health research, policy, practice, and education.

### In This Issue:

Outbreaks within the US military have shown that COVID-19 infections can sideline combat units and negatively affect unit cohesion. In this month's commentary, Dean Seehusen, MD, MPH, et al, argue that the recent legislation lifting the COVID-19 vaccination mandate for Active Duty military personnel has prioritized politics over national and personal protection.
