The University of Massachusetts Worcester (UMW), comprising the School of Medicine, the Graduate School of Biomedical Sciences and the Graduate School of Nursing, is firmly committed to an environment free of all forms of discrimination, harassment, intimidation, uncivil behavior or other acts of intolerance. UMW will not discriminate on the basis of race, color, religion, gender (including pregnancy, childbirth or related medical conditions), sexual orientation, age, national origin, ancestry, disability, covered veteran status or any other characteristics protected by law.

The University of Massachusetts Worcester (UMW), comprising the School of Medicine, the Graduate School of Biomedical Sciences and the Graduate School of Nursing, is firmly committed to an environment free of all forms of discrimination, harassment, intimidation, uncivil behavior or other acts of intolerance. UMW will not discriminate on the basis of race, color, religion, gender (including pregnancy, childbirth or related medical conditions), sexual orientation, age, national origin, ancestry, disability, covered veteran status or any other characteristics protected by law.

The Diversity and Equal Opportunity Office (DEOO) is charged with oversight for the University’s affirmative action and equal opportunity policies and for monitoring practices, procedures and programs designed to reach this goal. The DEOO works with all departments and services of the University to reasonably accommodate persons with disabilities or specific religious convictions if such accommodations do not present an unreasonable burden for either the institution or the program of study.

Persons with disabilities or impairments who need assistance to access the information in this catalogue should contact the DEOO at 508-856-2179; TDD: 508-856-6395.

This catalogue is intended to provide academic and nonacademic information about graduate study at UMW to persons who work and study here, to persons who may be interested in applying for admission and to the general public. UMW is fully accredited by the Liaison Committee on Medical Education and the New England Association of Schools and Colleges. The Master’s and Doctor of Nursing Practice Programs of the GSN are accredited by the:

Commission on Collegiate Nursing Education (CCNE).

MESSAGE FROM THE CHANCELLOR

There has never been a more exciting time to be a part of the University of Massachusetts Worcester (UMW), the commonwealth’s only public academic health sciences center. UMass Worcester brings together an extraordinary community of faculty, students and staff who provide state-of-the-art education, conduct groundbreaking research and take the lead in public service initiatives in Massachusetts and around the globe. Graduate School of Nursing students benefit from studying at an institution at the forefront of scientific advancement, one that attracts close to $350 million in research funding annually and consistently produces breathtaking advances in basic and clinical research.

The 10-year, $1 billion Massachusetts Life Sciences Bill enacted in 2008 casts our institution in a critical role in research, discovery, development and education in Massachusetts, most notably through the establishment of the Albert Sherman Center (ASC). The 512,000 square foot, state-of-the-art research and education facility, which opened in 2013, greatly expanded our research capacity and created an ideal learning environment for our students.

The ASC houses many dynamic and complementary research programs, such as the RNA Therapeutics Institute, the Department of Quantitative Health Sciences and the Program in Systems Biology, that will bring together some of the best minds in the world focused on creating new therapies for debilitating diseases. Among them is researcher Craig Mello, PhD, a Howard Hughes Medical Institute Investigator who was awarded the 2006 Nobel Prize in Medicine with colleague Andrew Fire, PhD, of Stanford University for their discovery of RNA interference (RNAi). Since their seminal paper published in Nature detailed gene silencing by double-stranded RNA, the technology of RNAi has revolutionized biomedical research. Scientists realize that if RNAi is used to shut down disease-causing genes, then promising new therapeutics can result. Recognized as a global center for RNA-related research and collaboration, UMass Worcester boasts a growing cadre of internationally renowned experts in this field.

The seven-story, 258,000 square foot Ambulatory Care Center (ACC) is another new facility on the campus that exemplifies our commitment to education, research discovery and clinical translation. The ACC offers a unique complement of cutting-edge patient care clinics and education and translational research programs.

While advancing scientific innovation, we continue to be a leader in educating the health care providers of the future. UMW’s goal is to prepare graduates to become compassionate healers. As the country sorts through the implications of the historic health care reform law now being implemented nationwide, we will continue to educate the care givers who will be able to meet their patients’ health care needs in a new way. Moreover, with a special emphasis on primary care, we are committed to serving the public interest both locally and globally.

Amid all these exciting new developments, our guiding principles remain unchanged and unwavering. In all that we do, our institution places the highest priority on respect for the dignity and diversity of every member of our campus community and remains fully committed to supporting our students’ professional, intellectual and emotional growth so they may have the opportunity to fulfill their potential and achieve their professional goals. I invite you to learn more about the Graduate School of Nursing through this catalogue and explore how joining our community can help you fulfill your dreams.

Michael F. Collins, MD
Chancellor, University of Massachusetts Worcester
Senior Vice President for the Health Sciences,
University of Massachusetts
MESSAGE FROM THE DEAN

The mission of the Graduate School of Nursing (GSN) at the University of Massachusetts Worcester (UMW) is to prepare nurse scientists, advanced practice nurses, and nurse leaders who together will improve the health care of the Commonwealth of Massachusetts and beyond. Consistent with our public mission, the GSN focuses on care to the underserved. This is accomplished through partnerships with UMass Memorial Health Care and Commonwealth Medicine, the public, nonprofit consulting organization founded by UMW to help state agencies and health care organizations enhance the value, access and delivery of care for at-risk populations.

UMass Worcester consists of three schools: the School of Medicine, the Graduate School of Biomedical Sciences and the Graduate School of Nursing. The GSN’s distinct focus and location generate many interprofessional opportunities for collaborative graduate education, research and practice. The GSN is distinctive as the only publicly funded nursing school in the commonwealth with a sole focus on graduate nursing education. It is also one of only three nursing schools in New England based at an academic health sciences center, sharing campus resources and facilities with its clinical partner, UMass Memorial Medical Center, part of UMass Memorial Health Care.

The GSN’s educational approach promotes lifelong learning through partnerships and interprofessional collaboration in an academic health center environment. The new Albert Sherman Center will enhance the learning environment and add designated learning community space and experiential learning capacity. The GSN’s nurse practitioner tracks lead the way in hospital and community-based practice. The nurse educator program prepares graduates with the knowledge to develop contemporary educational programs in the hospital or academic setting.

The Graduate Entry Pathway (GEP) provides the opportunity for individuals with non-nursing degrees to pursue a career as advanced practice nurses. Many of our GEP students choose the nurse practitioner tracks that contribute to meeting the well-documented shortage of primary care providers.

The Doctor of Nursing Practice (DNP) program prepares advanced nursing practice leaders for careers in health care settings with diverse populations and education settings for professional nursing programs. The PhD program prepares the next generation of nurse scientists who are critical to discovering the knowledge that supports the highest quality patient care through evidence-based nursing practice. The majority of our PhD graduates pursue academic careers in the public college and university setting, filling a critical role in developing the nurses of the future.

GSN graduates are recruited as clinical providers in the acute and primary care settings, and as faculty for all levels of nursing education. Doctoral graduates hold faculty, research and high-level nursing executive positions locally and nationally. As the dean of the GSN, I am proud to represent the ongoing legacy of commitment and service to the citizens of our region. I invite you to learn more about the GSN’s unique and challenging programs in the pages of this catalogue.

Paulette Seymour Route, PhD, RN
ABOUT THE UNIVERSITY OF MASSACHUSETTS WORCESTER

The University of Massachusetts Worcester (UMW) was founded by proclamation of the governor and an act of the legislature to meet the health care needs of the residents of the commonwealth. Its mission is to advance the health and well-being of the people of the commonwealth and the world through pioneering education, research and health care delivery with its partner, UMass Memorial Health Care. UMW is one of five campuses that make up the University of Massachusetts. Other campuses are located in Amherst, Boston, Dartmouth and Lowell.

A local, regional and statewide health resource, UMW comprises the School of Medicine, opened in 1970; the Graduate School of Biomedical Sciences, opened in 1979; and the Graduate School of Nursing, opened in 1986. UMW also offers dynamic graduate medical education and continuing medical education programs.

Beyond fulfilling its core missions of health sciences education and public service, UMW is home to a thriving biomedical research enterprise. With major funding from the $1 billion Massachusetts Life Sciences Bill signed into law in 2008, UMW research programs are central to the Massachusetts Life Sciences Initiative. Federal and private research grants and contracts reached over 240 million in fiscal year 2013. In 2006, UMW professor Craig C. Mello, PhD, and his colleague Andrew Fire, PhD, of Stanford University, were awarded The Nobel Prize in Physiology or Medicine by the Nobel Assembly at Karolinska Institute for their discoveries related to RNA interference (RNAi). First published in the journal Nature in 1998, their research showed that a particular form of ribonucleic acid (RNA)—the cellular material responsible for the transmission of genetic information—can silence targeted genes. This RNAi process offers astounding potential for understanding and manipulating the cellular basis of human disease and for the development of new therapeutics for disease treatment and cure.

Educational Mission

When the School of Medicine opened in 1970, UMW’s singular educational objective was to provide high quality and accessible medical education to the residents of the Commonwealth of Massachusetts. Through the subsequent openings of the Graduate School of Biomedical Sciences and the Graduate School of Nursing, UMW has broadened its educational reach to train highly qualified professionals to practice in all arenas of integrated health care and research.

The Graduate School of Nursing offers master’s, post-master’s and doctoral degrees, preparing registered professional and advanced practice nurses within nurse practitioner and nurse educator tracks and for faculty, research and other nursing leadership positions. Subtrack professional and clinical education is also offered in selected areas. The basis for study includes theoretical foundations of professional and advanced practice nursing, research process and design, societal forces that influence nursing, advanced pathophysiology, pharmacology, health assessment, clinical decision making, track content and clinical education.

The Graduate School of Biomedical Sciences comprises two divisions—Basic & Biomedical Sciences and Clinical & Translational Sciences—and ten programs of study. The graduate programs train students in their selected track area and emphasize a broad background in the basic medical sciences, in preparation for research with direct relevance to human disease. Graduates are equipped to collaborate with scientists and physicians involved in basic research and clinical observations, and are prepared to initiate careers as educators in schools of the health professions or in the biotechnology industry.

Consistently ranked by U.S. News & World Report as one of the leading medical schools in the nation for primary care education, the School of Medicine has a foremost responsibility to provide our students with an accessible, comprehensive and personally rewarding medical education of the highest quality,
one that optimally prepares them to excel as tomorrow’s physicians—caring, competent, productive and fulfilled in their chosen career serving a diversity of patients, communities and the health sciences. The school is committed to training in the full range of medical disciplines, with an emphasis on practice in the primary care specialties, in the public sector and in underserved areas of Massachusetts.

Our educational program has benefited in recent years from major investments in state-of-the-art educational technology and medical simulation, including the Albert Sherman Center, a 512,000 square foot research and education building opened in 2013. In addition to doubling the research space on campus, the Sherman Center serves as the home to the interprofessional Center for Experiential Learning and Simulation (iCELS), a 24,000-square-foot comprehensive, full-service simulation center.

The educational mission is further enhanced by 46 accredited residency and fellowship programs; cooperative degree programs with area colleges and universities; diverse community-based education programs across Massachusetts; outstanding achievements in basic and clinical research in the health sciences; and the Commonwealth Medicine division, dedicated to serving the state’s broad community of health care and service agencies. As the commonwealth’s only public medical school, UMW places an emphasis on partnerships with the community, creating opportunities for students to learn in and contribute to serving Massachusetts communities and the care of its vulnerable and underserved populations.

The mission of the Office of Ethics is to foster an environment in which all members of the UMW community are encouraged to recognize the values embedded in human interactions and to develop the skills necessary to respond appropriately. Committed to providing high quality ethical consultation and educational programming, the office maintains a computerized collection of resources relevant to ethical issues in health care, which is available to all members of the UMW community.

**Interprofessional Education** Interprofessional Education (IPE) has been integrated into the GSN and UMass Worcester’s public service and educational mission. The World Health Organization Framework for Action recognizes the need for interprofessional education and collaborative practice to meet the demands for a paradigm shift in health care delivery from individuals to teams of providers in order to improve care for individuals and populations. The 2011 Core Competencies for Interprofessional Collaborative Practice are integrated along with determinants of health into educational curricula to promote a culture of team learning and team-based practice that is patient, family and population-centered across the full continuum of care. As an academic
health sciences center, the GSN enjoys many collaborative opportunities for interprofessional teamwork to promote the national Healthy People 2020 goals and objectives with medically underserved, vulnerable and/or high-risk populations.

IPE experiences include interprofessional clerkships, population health community service learning practica, simulation scenarios, optional enrichment electives and clinical immersions in a variety of settings focused on health disparities and population-based needs. Practica, clerkships, and clinical sites include partnerships with the Massachusetts Department of Corrections, Massachusetts Department of Public Health, Edward M. Kennedy Community Health Center, Worcester Family Health Center, geriatric health centers, Worcester Department of Public Health, Worcester Public Schools, and the Worcester Senior Center. Other examples of interprofessional educational practica available to GSN students include the Geriatric Interest Group, Correctional Health Clerkship, Worcester’s Community Immunity public immunization clinic, End-of-Life Care, Geriatrics Fall Prevention, Ghanaian Women’s Health and Oral Health in Diverse Populations.

Public Service Mission
The faculty, students and staff of UMass Worcester are committed to making an impact on the health and well-being of the people of the commonwealth and the world. Every day, in ways large and small, our institutional community is actively and passionately engaged in the communities we serve, undertaking numerous and varied outreach initiatives with partners in the academic, business and philanthropic fields. Collaborations include partnerships with the long-running Worcester Pipeline Collaborative and Regional Science Resource Center, both award-winning programs recognized as national models for K–12 science, technology, engineering and mathematics education outreach; and student-run, faculty-supervised free clinics that provide care for underserved and economically disadvantaged patients.

By working with schools, community groups and social service organizations, UMass Worcester’s reach is extended into places where we can make a difference. And by creating and sustaining relationships with the social and cultural fabric of the region—and, indeed, much of the world—we provide both real-world help and role models for the next generation of nurses, doctors, researchers and leaders.

The Office of Global Health is the latest conduit to broaden UMass Worcester’s reach. The office coordinates and optimizes current and future endeavors in global medicine to elevate it to a more visible, high-impact initiative; develop a network of international activities that can inspire UMW medical, nursing and basic science students as on-site teachers and practitioners; and enhance training of health care providers internationally. The Office of Global Health also works with the Office of Research to help coordinate specific clinical trials and epidemiological studies as opportunities arise.

Commonwealth Medicine
The Commonwealth Medicine division carries out UMW’s public service mission by applying unparalleled skills and experience to raise the quality of health care programs. The division reaches beyond the traditional boundaries of academia to establish research initiatives, training programs and clinical services focusing on the public sector. This approach—instrumental in creating groundbreaking programs in health care reform, public sector financing, clinical training and policy research—has met with remarkable success.

Today, Commonwealth Medicine operates dozens of programs and centers, serving state and federal agencies and other health care organizations in 20 states and internationally, providing health care consulting, service delivery, policy and program development, and financing services and strategies. Its current efforts—and many successes—are the building blocks of the health delivery model of the future.
Examples of our service delivery programs include the Community Case Management program, which coordinates needed services for children disabled by complex, chronic medical problems. We also work with individuals with acquired brain injuries who live in nursing homes, but whose quality of life could be improved in home or community settings, and create transition plans to help them move to a community setting.

Facilitating educational opportunities for UMW students, Commonwealth Medicine was instrumental in launching the Graduate Entry Pathway in the Graduate School of Nursing. This program includes cooperative training opportunities that encourage public service. In addition, Commonwealth Medicine partnered with the Graduate School of Biomedical Sciences to develop the PhD program in Clinical & Population Health Research, one of the first in the nation to promote graduate study that fosters the analytic skills and methods necessary to conduct both health services and clinical research.

Currently, nursing students have a chance to learn more about Commonwealth Medicine’s services through our Disability Evaluation Services program. This opportunity, available to some students through one of the primary care rotations, allows students to gain an overview of the disability process in Massachusetts. It provides an awareness of the federal and state criteria used for making disability determinations, as well as an overview of MassHealth, the Massachusetts Medicaid program, and the Massachusetts Department of Transitional Assistance.

Learn more about Commonwealth Medicine at www.commed.umassmed.edu.

Community Outreach

The GSN is distinguished by its unwavering support of public service, as exemplified by the breadth and depth of voluntary service and community activism on the part of its students. GSN students, along with School of Medicine students who are part of the UMass Worcester International Health Interest Group, participate as part of an interprofessional team in the Dominican Republic (DR) Mission, an annual medical service trip. Students work in medical teams along with interprofessional faculty clinicians, providing mobile clinics for immigrant workers in rural villages. Each small team cares for approximately 100 patients each day. In addition to the mobile clinics, students organize educational sessions in the villages and discuss issues pertaining to women and children’s health and preventive care, particularly ways to reduce the spread of infectious disease. The DR Mission is hosted by the Good Samaritan Foundation, an organization that for more than 20 years has served Haitian immigrants working in sugar cane fields near the city of La Romana.

GSN goals are consistent with the Massachusetts Department of Higher Education (DHE) Nursing Initiative, which also addresses numerous academic and workforce issues. We are fortunate to have Dean Paulette Seymour Route represent UMass Worcester on the DHE Nursing Advisory Committee.

The HIV Education and Prevention Project is a collaborative effort undertaken by GSN faculty Carol Jaffarian, MSN, and Carol Bova, PhD, on behalf of UMass Worcester and the Armenian Relief Society. The World AIDS Foundation has provided funding support enabling them to conduct nursing research in Armenia for HIV needs assessment and education. Ms. Jaffarian is also an executive committee member appointed to the United Nations Non-Governmental Organization (NGO) Committee on HIV/AIDS.

Graduate Student Nursing Organization (GSNO)

The purpose of the Graduate Student Nursing Organization (GSNO) is to foster communication, coordination and continuity among graduate students and the administration and faculty of UMW, the GSN and the University of Massachusetts community. Membership includes all full and part-time students enrolled in the GSN. The GSNO has also become involved with interprofessional offerings at UMW, connecting with students from
the School of Medicine and the Graduate School of Biomedical Sciences. The GSNO and GSN students are involved in many service-related initiatives including the DR Mission trip, the UMass Medicine Cancer Walk, volunteer opportunities in local health care clinics, community refugee work and international relief missions.

**Worcester Nursing Pipeline Consortium**

The GSN is a founding member of the Worcester Nursing Pipeline Consortium (WNPC), whose mission is to increase enrollment, retention, graduation and academic advancement of qualified nursing students and nurses committed to improving health care in Central Massachusetts. In partnership with nursing schools at all levels of nursing education within Central Massachusetts, as well as clinical and community partners, the WNPC seeks the recruitment and retention of qualified prospective students committed to improving health care; promotes the image of nursing as a health career through the WNPC in partnership with health care agencies, institutions, schools and communities; and links nursing schools within Worcester and Central Massachusetts to expedite career advancement among qualified and talented students.

Approximately 15 years since its inception, the WNPC has expanded its membership to 17 academic, clinical and community partners who share common goals and interests related to recruiting students into nursing careers and supporting the development of faculty nurse educators. Programs sponsored by GSN in partnership with WNPC include the Annual Nursing Expo that exposes interested high school students, their parents and teachers to the various aspects of nursing education and practice; nursing student recruitment campaigns; novice nurse educator events; workshops; mentorship programs; and preceptor partnerships. WNPC continues to receive funding from the Fairlawn Foundation and its member organizations to carry on its vital mission of addressing the nursing and nurse educator shortage in the area with scholarships.

**Research Mission**

The research mission of UMass Worcester is to promulgate scientific inquiries that produce groundbreaking discoveries in the basic and clinical sciences. Currently supporting more than 300 investigators, the growing UMW research enterprise has led to stimulating advances in the treatment of disease and injury, as UMW scientists undertake research to discover the causes of and cures for the most devastating diseases of our time.

Accomplished faculty members include a Nobel Prize winner; one Lasker Award recipient; three members of the National Academy of Sciences; a member of the Royal Society; six Howard Hughes Medical Institute Investigators; Banting Medal awardees; Pew and Keck scholars; MERIT awardees; a Fellow of the American Association for the Advancement of Science; cancer research award recipients; and many other winners of scientific accolades. Capitalizing on a collaborative environment, UMass Worcester research expertise lies in both basic and clinical
areas, with concentrations in diabetes, molecular genetics, immunology, virology, HIV/AIDS, cancer, signal transduction, structural biology (with attention to innovative drug design), bone cell biology, chemical biology, gene function and expression, neuroscience, imaging, and occupational and environmental health.

Research growth is reflected in increased funding levels. Extramural funding has more than doubled since FY ’98 to more than $240 million in FY ’13.

Today, UMass Worcester is proud to be at the forefront of the commonwealth’s Life Sciences Initiative, having received funding in 2007 and 2008 to establish an Advanced Therapeutics Cluster (ATC) on campus. The ATC brings together an interdisciplinary group of research faculty and physician-scientists in three interconnected research clusters—neurodegenerative disease, RNA biology and gene therapy. RNA studies at UMW are conducted by world leaders in the field.

The ATC is housed in the Albert Sherman Center, a new research and education facility opened in 2013 that adds approximately 512,000 square feet to a campus that has grown exponentially over the past 10 years. The Albert Sherman Center doubles the campus’s research capacity and follows on the heels of the Aaron Lazare Medical Research Building, an innovatively designed research facility that added 360,000 square feet of laboratory space to UMW when it opened in the fall of 2001.

The Graduate School of Nursing research mission is to provide students and faculty with a scholarship research cluster based on partnerships and collaboration. Our research focus is on individual and family health behaviors in chronic conditions, with faculty focusing on chronic disease management and support for individuals and families with HIV/AIDS and other infectious conditions, diabetes, cancer, cardiovascular disorders, community health disparities and workforce development for high quality health care. The GSN Research Advisory Committee (RAC) is an innovative standing committee that was initiated to identify and provide faculty with opportunities to access the support they need to further develop their programs of research or scholarly projects that address individual, family and/or community needs. This support provides faculty with a dynamic environment in which to conduct research at the discovery/exploratory, descriptive, predictive and/or intervention level with the goal of improving clinical and/or community outcomes. This type of environment and scholarship is vital for educating and socializing our students in the research process and to support their future research and evidence-based practices. The RAC also interfaces with the UMass Center for Clinical and Translational Science in an effort to develop innovative interdisciplinary research teams that include nurse scientists and students, and provides guidance and support to equip faculty and students with the tools and research-related resources needed to tackle research or projects dealing with complex health problems. As an intensive education-teaching environment, the GSN also explores education research opportunities with faculty to identify novel and innovative ways to teach graduate students and to evaluate new methods. All of these activities advance the scientific foundation for professional nursing practice through intra- and interprofessional research endeavors and the dissemination of such research.

Lamar Soutter Library
The Lamar Soutter Library is the physical and virtual center for information resources at UMass Worcester. These resources include access to more than 5,000 online journals, as well as access to major biomedical electronic databases and to a comprehensive collection of both print and electronic books. In addition to standard medical resources, the Lamar Soutter Library also houses a Humanities in Medicine collection, a Women in Medicine collection and a History of Medicine collection, as well as rare books and the archives of the institution.

Members of the library staff are intrinsically immersed in the curriculum of the school,
supporting students’ knowledge of utilizing and analyzing highest quality medical information. Instruction offered by the library includes the use of online bibliographic management tools, seminars in Evidence-Based Medicine and workshops in effective ways to locate and retrieve resources needed for both scientific and clinical work.

The library’s computer area includes more than 100 workstations for access to word processing and spreadsheets, and to the library’s electronic resources via the internet. The library’s electronic resources are available off-campus to UMW students and faculty via proxy.

The Lamar Soutter Library is one of eight regional resource libraries affiliated with the National Library of Medicine. In addition, the library participates in a number of consortial agreements that greatly expand the availability of resources for students. The library also takes an active role in community information outreach in our role as the only public medical library in Massachusetts, and serves as the library for the school’s clinical partner, UMass Memorial Health Care. Centrally located on the UMW campus, the library also serves as a gathering place for cultural activities such as employee and student art exhibits, book readings and guest lectures.

**Standardized Patient and Interprofessional Experiential Learning and Simulation Programs**

The Interprofessional Center for Experiential Learning and Simulation called iCELS at UMass Medical School provides state-of-the-art simulation to meet the educational needs of our academic health sciences center, for the benefit of our students, faculty, learners, staff, patients and our communities. UMW has long used patient simulation as an essential component of its academic and clinical training.

Established in 1982 originally as the Standardized Patient Program (SPP), iCELS provides exemplary simulation development, programming, and research for medical, nursing and clinical professionals. Hands-on simulation experiences can build bridges among disciplines and transform health sciences education and practice.

iCELS staff work collaboratively with instructors to design, implement, and assess clinical simulations as we serve the educational needs of UMass Medical School—and offer state-of-the-art simulation technologies and support to New England’s clinical and professional health care workforce. iCELS reflects the environment fostered at our academic health sciences center—innovation and excellence in education, basic and translational research and patient-centered care. UMW standardized patients number more than 100, and represent some of the best in the country.

The iCELS vision is to be the simulation hub for excellence in education, training, research and innovation, serving our campus, clinical partner, affiliates and the greater Worcester and Central Massachusetts community. As a campus-based, community-wide resource, the iCELS brings together a diverse array of teachers and learners, forging new partnerships that will build a community of simulation talent and expertise at UMMS and beyond. Our working model of interprofessional education creates the ideal learning environment for promoting patient safety and advancing quality care through experiential learning and team-based teaching, training and practice. The ideal learning environment of iCELS will foster learner centered teaching, life-long learning through deliberate practice; robust performance-based assessment and the special opportunity to learn in safe and risk-free setting.

With the flexibility to simulate clinic rooms, inpatient facilities, disaster sites, and other health care settings, the interprofessional Center for Experiential Learning and Simulation (iCELS) is a resource for creating cutting edge teaching and assessment experiences. Housed in the Albert Sherman Center on the UMass Medical School Campus in Worcester, Mass., the two-floor, 24,000 square-foot iCELS facility offers:
• 20 clinic exam rooms furnished with ambulatory care equipment and supplies
• Four large simulation scenario rooms that can be set up in various ways to mimic clinical and/or emergency situations
• Clinical skills lab with 11 beds/stations with an array of patient care equipment and supplies and three stations with wall mounted air/suction
• Technical skills lab features separate wet and dry lab space to provide training modalities from wet tissue to virtual reality
• Video capture and playback throughout the center
• High-fidelity simulators
• Task trainers
• Clinical equipment
• Virtual trainers

Our technology-infused space is supported by CAE LearningSpace, a comprehensive audiovisual and center management system. CAE LearningSpace integrates the captured audio, video and performance data in a web-based format. Instructors and students can view videos and data both onsite and remotely for immediate debriefing and ongoing feedback.

Services for Students
The Graduate School of Nursing office and the UMW Offices of Student Affairs, Diversity and Equal Opportunity, Financial Aid, Admissions, the Bursar and the Registrar are on the first floor of the main school building. The Lamar Soutter Library, student laboratories and other student areas are open at night for students who wish to study or work in the building.

Diversity and Student Affairs
The Offices of Student Affairs and Diversity and Equal Opportunity work collaboratively to ensure a supportive environment that is consistent with UMW values and conducive to preparing nursing students to serve diverse populations and relate to a global society. Diversity is promoted within our institution to foster an atmosphere of compassion, civility and mutual respect, stimulating inventiveness and broadening our talents and perspectives. To that end, we seek to nurture the academic, professional and social lives of all of our graduate students and especially those from racial groups that are underrepresented in health care and our GLBT students. The support includes advising, coaching and assisting with academic achievement, social and personal issues. Students are encouraged to participate in professional conferences along with UMW faculty. Through UMW-sponsored networking events and Mentoring Circles Program, students, faculty and residents work to build an inclusive culture by leveraging differences.

Accommodations for Students under the Americans with Disabilities Act
According to the Americans with Disabilities Act (ADA), a disability is defined as an impairment that substantially limits one or more of the major life activities of an individual; a record of such an impairment; or the perception that one has such an impairment. UMW is firmly committed to providing full access to individuals with disabilities. In so doing, UMW intends to fully comply with the Americans with Disabilities Act (ADA) of 1990 and Equal Employment Opportunity Commission guidelines. Students who avail themselves of the ADA will not be related with prejudice or adversity. The Office of School Services, working in collaboration with the Diversity and Equal Opportunity Office (DEOO), coordinates all student disability issues. The Vice Provost for School Services serves as the ADA Student Coordinator. Once admitted, the student is responsible for notifying the ADA Student Coordinator of his/her disability, requesting academic accommodations in writing and providing appropriate documentation of the disability. A student may request accommodations at any time during matriculation. All requests for accommodations are reviewed and acted on by the Academic Accommodations Committee. It is always the student’s choice whether or not to accept any recommended accommodation. Confidentiality is a strict practice of the Academic Accommodations Committee. Students may be referred to the
Academic Accommodations Committee by course coordinators or Academic Evaluation Boards for analysis of the academic difficulty and its possible relationship to a disability. Accommodation under ADA will not be in conflict with the fundamental nature of the academic programs of UMW. Learn more at www.umassmed.edu/schoolservices/ada.aspx.

Appropriate Treatment of Students Policy

The University of Massachusetts Worcester (UMW), in accordance with its mission statement and operating principles, and as required for accreditation by the Liaison Committee for Medical Education (LCME), has developed this policy to help ensure the appropriate treatment of students (ATS). This procedure is specifically required for the accreditation of the School of Medicine, and has also been approved by the deans of the Graduate School of Biomedical Sciences, Graduate School of Nursing, Graduate Medical Education, and Office for Postdoctoral Scholars. To the extent possible, it is the policy of UMW to provide a learning environment that fosters mutual trust and understanding between teachers and students. When all participants in the educational process at UMW understand and uphold the standards of appropriate treatment of students, the environment enhances teaching, learning and professional development, to the benefit of all. Inappropriate treatment occurs when the behavior shows disrespect for the dignity of others and unreasonably interferes with the learning process. It can take the form of physical punishment or threat, sexual harassment, psychological cruelty, and discrimination based on race, color, creed, religion, gender, age, sexual orientation, gender identity and expression, genetic information, national origin, covered veteran status, disability, ancestry or any other characteristic protected by law. Please note that separate schoolwide policies are in place covering sexual harassment, consensual amorous relationships and discrimination based on protected-class status.

For more information, including definitions, policies and procedures for reporting inappropriate treatment, students are encouraged to contact the DEOO http://www.umassmed.edu/deoo/index.aspx

The DEOO is responsible for coordination and monitoring of ATS complaints, for training faculty members to serve as resource persons for students with ATS-related inquiries and concerns, and for ongoing oversight and periodic review of the training process.

Student Counseling Service

Student Counseling Services (SCS) provides counseling, psychotherapy, assistance with stress management and educational programs on emotional well-being for students. Students come to SCS seeking personal growth and greater self-understanding as well as healthier psychological functioning. Many students using the service want to cope more effectively with difficult or stressful academic situations, while others seek counseling to deal with broader life issues. Some students come because of more serious, troublesome and/or chronic difficulties in their lives. Others are beginning to address health and wellness issues. SCS maintains strict standards of privacy and confidentiality. The service cost is covered by the prepaid Student Health Plan (SHP) fee.

Student Health Services

The Student Health Service (SHS) seeks to preserve and maintain the health of students while they are at UMW by providing up-to-date health screening programs as well providing routine health care for many of the students.

SHS maintains a dedicated Web site for all student health issues, including information on blood borne pathogen exposures, insurance plan, upcoming flu or TST clinics, and all SHS policies as well as access to all health clearance forms. The Student Health Service is located in a building adjacent to the Medical School and hospital.

Students may choose a primary care provider at SHS or off campus, including their current provider, with
approval of the SHS director. Hours of operation are 8 a.m. to 5 p.m. Monday through Friday, with 24/7 coverage available through the hospital’s emergency room.

The Student Health Plan (SHP) is the administrative entity funded by the mandatory student health fee, providing routine primary health care coverage to students under the direction of physicians or nurse practitioners. With an additional fee, students may elect to have their immediate family members (i.e., spouse, children) covered under the SHP. Students are covered by the SHP during their period of enrollment, from registration though Aug. 31 of the following school year. A brochure describing the plan and its services is available through the Student Health Service. The University requires all students to carry supplemental insurance to cover specialty consultations, diagnostic evaluations and inpatient services. Such a policy may be purchased either through the University or privately.

Food Services
The cafeteria and dining room are located on the first floor of UMass Memorial Medical Center–University Campus, which is contiguous to UMW. The menu features a variety of selections, including a large salad bar, deli bar, grill, soups, entrees, snacks, pastries and beverages. In addition, a second cafeteria is located in the Albert Sherman Center.

Campus Bookstore
Located in the Medical School building lobby, the campus bookstore is open Monday through Friday from 7:45 a.m. to 4 p.m. The bookstore offers all required text and reference books (at a 5 percent discount with no tax charged) for the School of Medicine, Graduate School of Biomedical Sciences and Graduate School of Nursing. Books not in stock may be ordered through the store at www.umassmed.edu/bookstore. Trade books, school clothing, school insignia items, medical instruments, school supplies, magazines and a variety of snack foods are available. The bookstore also offers UPS shipping services.

Housing and Transportation
Graduate School of Nursing students reside in the local community or commute, as housing facilities are not available on campus. Bus transportation to the campus is available via several routes. Those who wish to park on campus are required to register with the Office of Public Safety and pay an annual parking fee.

UMass Memorial Health Care
UMass Memorial Health Care, Inc. is the clinical partner of the University of Massachusetts Worcester and the largest health care system in Central and Western Massachusetts. It is a not-for-profit, integrated system designed to provide all levels of health care from primary to quaternary. UMass Memorial Health Care delivers care through the UMass Memorial Medical Center and community hospitals (Clinton Hospital, HealthAlliance Hospital and Marlborough Hospital) with health care services further enhanced and augmented by community primary care practices, ambulatory outpatient clinics, home health agencies, hospice programs, rehabilitation and mental health services.

As the region’s tertiary referral center, UMass Memorial Medical Center offers a full complement of advanced technology and support services, providing the region with a broad range of specialists renowned for their expertise in clinical areas, including the Centers of Excellence—heart and vascular, cancer, musculoskeletal and diabetes—as well as emergency medicine, surgery, women’s health and children’s medical services.

UMass Memorial Medical Center is a 781-licensed-bed facility on three campuses: Hahnemann, Memorial and University. UMass Memorial Medical Center records 134,000 visits at its two emergency departments located on the University and Memorial Campuses. The Medical Center is also the region’s transplantation center and provides liver, kidney, pancreas and bone marrow transplantation.

Clinical services are focused on radiation therapy and cancer care, neurology, trauma and critical care,
psychiatry, surgery and advanced cardiovascular care. The Heart and Vascular Center of Excellence provides integrated, patient-centered heart and vascular care by using the latest research and technology available in cardiovascular medicine and surgery. UMass Memorial Medical Center is the number one hospital in Massachusetts five years in a row for heart survival according to the U.S. Center for Medicare and Medicaid Services.

The Weight Center provides medical and multidisciplinary support services in the specialty of bariatric medicine, including gastric bypass surgery, behavioral therapy and comprehensive follow-up care for weight management. The Children’s Medical Center provides extensive services, including an internationally recognized newborn intensive care unit, orthopedics, gastroenterology, neurology, pulmonology, oncology and surgery, the only pediatric intensive care unit in Central Massachusetts, and the Child Protection Program, providing evaluations of children for suspected abuse, neglect and maltreatment. The Children’s Medical Center is accredited by the National Association of Children’s Hospitals and Related Institutions, a designation that identifies it as a facility delivering exceptional care to children.

The Duddie Massad Emergency and Trauma Center on the University Campus, the region’s only Level I trauma center, is the home base of Life Flight, New England’s first hospital-based air ambulance and the only emergency helicopter service in Central Massachusetts. Since its founding in 1982, Life Flight has become one of the busiest single-aircraft services in the country, with more than 27,000 patient flights. The Duddie Massad Emergency and Trauma Center provides training and consultation to providers and appoints medical directors for area towns’ emergency medical services. UMass Memorial also sponsors the Disaster Medical Assistance Team – Massachusetts (DMAT-MA2), a volunteer group of professional and paraprofessional medical personnel who augment local medical efforts and provide emergency medical care during a disaster or other adverse event.

The University Campus is the site of the Ambulatory Care Center (ACC), offering a unique complement of state-of-the-art patient care clinics and translational research programs in a seven-story, 258,000-square-foot building. The ACC provides convenient access to outpatient services for cancer, diabetes, heart and vascular, orthopedics and to diagnostic testing services.

The Memorial Campus is a leading provider of acute care services in the greater Worcester area and offers a broad array of primary, secondary and tertiary care services. The maternity center delivers more than 3,900 babies a year, more than any hospital in the region. It is the regional referral center for women with high-risk pregnancies, and it provides the region’s only Level III Newborn Intensive Care Unit, a 49-bed unit providing the most advanced life-saving care for fragile infants. The Levine Ambulatory Care Center on the Memorial Campus is the site of the New England Hemophilia Center and provides cancer services, including radiation oncology, gynecological oncology and infusion treatments. The Department of Urology is also located on the Memorial Campus with clinics in the Levine Ambulatory Care Center. The full spectrum of urologic care is offered including cancer care, infertility, stone disease and robotic surgery. The Levine Center is also the hub for the Medical Center’s pre-surgical evaluation services.

In addition, the Spine Center and the Arthritis and Joint Replacement Center, also located on the Memorial Campus, provide a full spectrum of multidisciplinary care for orthopedic patients, including arthroscopic and open surgery for injury and orthopedic disease. Cardiologists also see patients for routine visits and diagnostic testing.

The Hahnemann Campus is home to the Medical Center’s day surgery services, including orthopedic (hand) and cosmetic surgery, as well as sports medicine, eye care and dermatology services. The Hahnemann Family Health Center is located at Hahnemann and is recognized by the National Committee for Quality Assurance as a Level 3 Patient Centered Medical Home.

**Academic Programs and Pathways**

The Graduate School of Nursing offers doctoral degrees, master’s degrees and post masters certificates, preparing registered professional and advanced practice nurses within nurse practitioner and nurse educator tracks for clinical practice, faculty, research and other nursing leadership positions. Specialties are also offered in selected areas. The basis for study includes theoretical foundations of professional and advanced practice nursing, research process and design, societal forces that influence nursing, advanced pathophysiology, pharmacology, health assessment, clinical decision making, track content and clinical education.
Doctor of Nursing Practice Program

The Doctor of Nursing Practice (DNP) program, established in 2008, is designed to prepare graduates as nurse practitioners (NPs) and post-master’s nurse practitioners and nurse administrators as advanced nursing practice leaders for careers in clinical practice with diverse populations, organizational and systems leadership in health care systems, and clinical nursing education. The program produces advanced practice nurses and provides education to nurse practitioners and administrators as a practice doctorate with the skills to apply principles of population health outcomes and evidence-based practice for improvement and transformation of patient care to clinical situations as interprofessional team members. Graduates are leaders with expert knowledge of practice and administration who will lead and improve nursing practice in Worcester, the commonwealth and beyond.

DNP Summary of Study

The program of study focuses on theory courses and residency experiences and represents a 128 (adult-gerontology acute or primary care NP tracks) or 132 (family NP track) credit curriculum for GEP to DNP Track; a 78 (adult-gerontology acute or primary NP tracks) or 82 (family NP track)-credit curriculum for BS to DNP; and, a 40-credit curriculum for the Post-Master’s DNP Track. The DNP program includes the advanced practice track curriculum component of the accelerated program (see GEP track descriptions). In addition, GEP to DNP, BS to DNP and Post Master’s DNP tracks consist of 22 credits of core courses including epidemiology, informatics, health policy, organizational systems, research and theory; and 18 track credits including residency courses, capstone project courses and electives. Students are also required to successfully complete a professional portfolio. The DNP program is an academically challenging one; therefore, full-time employment while in the program is not recommended.

Tracks to the DNP

GEP to DNP Track for individuals with a bachelor’s degree in a field other than nursing leading first to a master’s degree with the family nurse practitioner track then the Doctorate in Nursing Practice (DNP) Pathway.

Post-Master’s Track to DNP is for individuals with a master’s in nursing as nurse practitioners or nurse administrators.

There are two course sequences in the post-master’s DNP program based on entry as a:

- Nurse Practitioner
- Nurse Administrator

DNP Tracks

Nurse Practitioner Track
The students in the Nurse Practitioner Track are entering this program already certified as adult primary care nurse practitioners, adult acute care nurse practitioners, family nurse practitioners, gerontology nurse practitioners, pediatric nurse practitioners and women’s health care nurse practitioners. Consistent with the outcomes of the DNP program and upon completion of this track, graduates synthesize principles of population health, finance, health policy, informatics and organizational leadership to lead and transform health care as a nurse practitioner with a practice doctorate. They collaborate as members of interprofessional teams in the management of patients with complex health problems using an evidence-based approach. The graduates translate research findings to clinical practice to enhance the quality of health care and patient outcomes. They will assume positions in health care systems to lead and improve nursing practice as nurse practitioners with a practice doctorate.

The DNP curriculum of the nurse practitioner track provides students with advanced practice nursing leadership experiences. The core and track courses meet the standards established by the American Association of Colleges of Nursing for practice-focused doctoral programs in nursing. The nurse practitioner track also adheres to the competencies established by the National Organization of Nurse
Practitioner Faculties for advanced practice nurses with the DNP. A strong focus is on interprofessional partnerships with the UMW School of Medicine and Graduate School of Biomedical Sciences, Commonwealth Medicine, UMass Correctional Health, UMass Memorial Health Care and the greater Central Massachusetts community.

**Nurse Administrator Track**
DNP students in the post-master’s nurse administrator track are already nurse administrators in health care systems. Consistent with the outcomes of the DNP program and upon completion of this track, graduates synthesize principles of population health, finance, health policy, informatics and organizational leadership to lead and transform health care as nurse administrators with a practice doctorate. They collaborate as members of interprofessional teams to manage nursing services that deliver care to patients using an evidence-based approach. Graduates translate research findings to clinical practice to enhance the quality of health care and patient outcomes through nursing services administration. They will assume positions in health care systems to lead and improve nursing practice as nurse administrators with a practice doctorate.

The DNP curriculum of the nurse administrator track provides students with nursing leadership experiences. The core and track courses meet the standards established by the American Association of Colleges of Nursing for practice-focused doctoral programs in nursing. The Nurse Administrator Track adheres to the competencies and standards identified by the American Organization of Nurse Executives and the American Nurses Association for nursing administration. A strong focus is on interprofessional partnerships with the UMW School of Medicine and Graduate School of Biomedical Sciences, Commonwealth Medicine, UMass Correctional Health, UMass Memorial Health Care and the greater Central Massachusetts community.

**DNP Residency**
The focus of the DNP residency courses is the development and refinement of leadership skills. Experiences enhance each student’s ability to apply theories, standards of practice and evidence-based research findings to the care of increasingly complex patients, leading to improved practice and health care delivery. Each student works with his/her faculty advisor to select a residency practicum site that facilitates the development of leadership skills and completion of the capstone project.

**DNP Capstone Project**
Each DNP student is required to develop, implement, and evaluate a capstone project that translates research into practice. No student is exempt from this requirement. The capstone project includes three courses or six credits for the development, implementation and evaluation of the project. The student conducts the capstone project under the mentorship of his/her faculty advisor. Each student is expected to complete an oral presentation of the capstone project and to submit a scholarly paper to a peer-reviewed journal.

**Professional DNP Portfolio**
The focus of the professional DNP portfolio is to demonstrate the attainment of the DNP competencies established by the National Organization of Nurse Practitioner Faculties or the American Organization of Nurse Executives through formative and summative documentation. Each student must successfully meet the requirements of their professional portfolio prior to completing the DNP program.
**Doctor of Nursing Practice (DNP)**
The DNP is to prepare students for leadership roles as nurse practitioners or nursing administrators. The curriculum is designed to educate students to improve and transform health care through systems leadership, research translation and advanced clinical knowledge.

The GSN offers three tracks to the DNP:

- GEP to DNP Track
- Bachelor’s to DNP Track
- Post-master’s to DNP Track

The Post-master’s to DNP Track offers advanced nursing leadership role preparation for entering Nurse Practitioners and Nurse Administrators.

**DNP’s Program Outcomes**

**GEP to DNP Track**
The GEP to master’s program is designed to prepare advanced practice nurses as adult-gerontology primary care, adult-gerontology acute care, or family nurse practitioners. The graduates synthesize and integrate knowledge from the biological, psychological, social and nursing sciences. They also analyze the effect of developmental, economic, cultural, epidemiological, social, political, ethical, legal and spiritual factors influencing the care of patients with an emphasis on vulnerable and diverse populations. The graduates assess, intervene, and evaluate the responses of patients to health/illness states by applying the track competencies of advanced practice. They apply the standards of practice and evidence-based literature to make cost-effective clinical judgments in the context of quality patient outcomes. The graduates also manage health/illness care as a member of an interdisciplinary team implementing preventive and population-based health care in institutions and communities. As advanced practice nurses, they provide clinical leadership within the context of social, economic, political, legal, cultural and ethical forces that affect health care delivery, health policy and professional nursing practice. They contribute to the scholarly advancement of the nursing profession through education, research and clinical practice. The graduates embrace life-long learning through participation and leadership in professional development.

**The Graduate Entry Pathway to the DNP Degree**
The Graduate Entry Pathway (GEP) is designed for applicants who have a bachelor’s degree in a field other than nursing, who are not registered nurses and who seek a clinical practice doctorate as a DNP in nursing to become a nurse practitioner.

The GEP to DNP track is a full-time program lasting a minimum of 4.5 years that:

- prepares professional nurses for generalists as entry-level practice through initial licensure by examination in Massachusetts as a registered nurse;
- establishes the foundation for competent professional practice as a registered nurse with a requirement of 1000 RN practice hours by graduation; and equips students for studies in a track area in the Master of Science in Nursing program.
- GEP graduates receive a DNP.

**GEP Summary of Study**

**GEP Year One: Pre-licensure Component**
The academic calendar runs from mid-August to the end of July. During this period, students complete the courses and clinical experiences required for licensure as a registered nurse. Upon successful completion of pre-licensure requirements and enrollment in the subsequent 500- and 600-level courses in the first part of the GEP Year Two, the GSN will issue qualifying students a Certificate of Completion so that they may sit for the National Certification Licensing Examination for Registered Nurses (NCLEX-RN). The Certificate of Completion is not the equivalent of an academic degree, and is awarded in the Commonwealth of Massachusetts only to students who are enrolled in a graduate degree program.
**GEP Year One Outcomes**
Consistent with the terminal outcomes of the DNP in Nursing program, upon completion of Year One of the Graduate Entry Pathway, students will be able to:

- think critically for the purposes of exercising evidence-based clinical judgment and making ethical decisions;
- provide clinical nursing care using the core competencies and knowledge of a professional registered nurse;
- communicate effectively with individuals, families and communities of diverse backgrounds and with colleagues in other professional disciplines;
- demonstrate leadership skills to enhance health care delivery and promote professional nursing; and exemplify the personal and professional values and characteristics consistent with the professional nursing role.

**GEP Year Two**
Students transition into NP and DNP coursework. In the fall semester, in addition to 600 and 700 level graduate courses, GEP students take NG603C Interprofessional Population Health Clerkship. In the spring semester, GEP students also take NG522 Transition to Professional Nursing.

**GEP Year Three-Four**
In the final years of the GEP to DNP program, the plan of study will involve course work in the NP track concentration and DNP related coursework including DNP Capstone and leadership practicum experience.

GEP students are expected to complete 1,000 hours total (500 hours is required prior to the start of the clinical year in year 3) of work as a registered nurse before the end of their final semester in addition to their required clinical practica.

**GEP Nurse Practitioner Tracks**
Students in the Graduate Entry Pathway are eligible for entry into the track component of the DNP program, given successful completion of prerequisite coursework.

The DNP is available to GEP students are:

- Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP)
- Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP)
- Family Nurse Practitioner

**The Adult-Gerontology Primary Care Track**
The Adult-Gerontology Primary Care (AG-PCNP) NP track prepares advanced practice nurses to function in ambulatory or community-based settings as an adult-gerontology primary care nurse practitioner. The focus of the track is on the delivery of primary care to the individual within the context of the family and community. The direct role component includes the management and delivery of care for adult-older adults with common episodic or chronic health problems, and the core competencies emphasizing teaching, consultation and research. Graduates of this track are eligible to take the Adult-Gerontology Primary Care Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.

**Adult-Gerontology Acute Care Nurse Practitioner Track**
The Adult-Gerontology Acute Care (AG-ACNP) track prepares advanced practice nurses to function in acute or critical care areas as an adult-gerontology acute care nurse practitioner. This track focuses on the direct role component,
including the management and delivery of care to acutely ill adult-older adult patients, as well as the core competencies emphasizing teaching/coaching, consultation and research. Graduates of this track are eligible to take the Adult-Gerontology Acute Care Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.

**Family Nurse Practitioner Track**
The Family Nurse Practitioner (FNP) track prepares advanced practice nurses to function in ambulatory or community-based settings as a family nurse practitioner. The focus of the program is on the delivery of primary care to the individual within the context of the family and community. The direct role component includes the management and delivery of care to children and adults with common episodic or chronic health problems, and the core competencies emphasizing teaching, consultation and research. Graduates of this track are eligible to take the Family Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.

**Nurse Practitioner Track Outcomes**
Consistent with the outcomes of the master’s program and upon completion of these nurse practitioner tracks, graduates will be able to use critical thinking, communication, therapeutic intervention and professional role interaction to:

- synthesize knowledge from the biological, psychological, social and nursing sciences as a foundation for advanced practice nursing as an adult-gerontology primary care, adult-gerontology acute care and/or family nurse practitioner;

- assess, intervene and evaluate the responses of patients to acute, chronic and/or critical health/illness states over time in a variety of settings as an adult-gerontology primary care and/or adult-gerontology acute care nurse practitioner;

- utilize the standards of practice and evidence-based literature in the provision of patient care, based on critical analysis and evaluation of theory and research from nursing and related disciplines;

- implement both the direct care and core competencies of the adult-gerontology primary care, adult-gerontology acute care and/or family nurse practitioner role in interprofessional health care settings;

- assume clinical leadership in health care delivery systems, health policy organizations, and local and national nursing organizations;

- analyze the effect of developmental, economic, cultural, epidemiological, social, political, ethical, legal and spiritual trends influencing the care of children, adults and elders;

- participate in research and other scholarly activities related to clinical nursing; and

- Embrace life-long learning through participation and leadership in professional development.

**Specialties (Optional)**
UMass Worcester (UMW) GSN students are eligible to be enrolled in one of the optional UMass Worcester GSN specialties:

- Cancer Care
- Cardiovascular Care
- Critical Care
- Emergency Care (on Hold)
- Nurse Educator
A specialty consists of 2 three-credit didactic courses and clinical practicum(s). (Exception is Nurse Educator specialty). Students must take the coursework in order to be eligible for the clinical course(s). The clinical practicum requirements per specialty are as follows:

Cancer Care: 1 Credit (90 clinical hours) N/NG 686B
Cardiovascular Care: 1 Credit (90 clinical hours) N/NG 682B
Critical Care: 1 Credit (90 clinical hours) N/NG 643B
Emergency care: 2 Credits (90 clinical hours each, totaling 180 clinical hours)
Nurse Educator: Optional clinical component is available

Due to limited clinical practicums available, a maximum number of students will be accepted into each clinical practicum of the specialty. Prerequisites for the specialty: Permission of Instructor

Cancer Care
The Cancer Care specialty prepares nurses for advanced practice roles in cancer care and education within the adult-older adult patient population. The direct role components emphasize integrating theory, research and practice essential for the advanced practice oncology nurse. The program integrates the physiological and psychosocial components of cancer care.

Courses
Living with Chronic Conditions & Terminal Illness
N/NG685 3 credits
Advanced Practice Oncology Nursing
N/NG686 3 credits

Cardiovascular Care
The Cardiovascular Care specialty prepares nurses for advanced practice roles across the continuum of care from acute/critical care settings to ambulatory/community settings. The specialty focuses on health promotion strategies in clinics, hospitals and community-based settings for men and women at risk for experiencing acute and chronic cardiovascular diseases.

Courses
Advanced Practice Cardiovascular Nursing I N/NG681 3 credits
Advanced Practice Cardiovascular Nursing II N/NG682 3 credits

Critical Care
The Critical Care specialty prepares critical care nurses for the advanced practice nursing role to manage critically ill patients. The specialty focuses on assessment, diagnosis, stabilization, disease management, and prevention of complications of adults and older adults experiencing life threatening diseases and injuries requiring critical care knowledge and skills. Enrollment in this specialty is available to students who have recent nursing experience caring for patients in critical care settings.

Courses
Advanced Practice Critical Care Nursing I N/NG 643 3 credits
Advanced Practice Critical Care Nursing II N/NG 644 3 credit

Emergency Care (ON HOLD)
The Emergency Care specialty prepares nurses for
advanced practice roles in urgent and emergent care management. The specialty includes introductory and advanced care didactic and clinical courses including caring for and management of unstable patients with emergent and life-threatening conditions.

**Courses**

Advanced Practice Nursing in Emergency Care I N/NG 724A 3 credits
Advanced Practice Nursing in Emergency Care Practicum I N/NG 724B 1 credit
Advanced Practice Nursing in Emergency Care II N/NG 725A 3 credits
Advanced Practice Nursing in Emergency Care Practicum II N/NG 725B 1 credit

**Nurse Educator**

The Nurse Educator specialty prepares nurses for roles in faculty or staff development, providing an opportunity to acquire teaching skills and strategies that address student, program and patient outcomes as well as leadership skills to improve health care.

**Courses**

Advanced Nursing Science: Teaching and Curriculum Development for Nurse Educators N/NG620 3 credits
Advanced Nursing Science: Identifying and

Measuring Outcomes for Nurse Educators N/NG623 3 credits
Note: Permission of instructor is required for consideration of an independent study clinical component for this specialty.

**Number of Years to Complete Educational Program**

It is expected that students admitted into the Graduate School of Nursing will complete graduation requirements within a specified number of years (not counting time away for an approved leave of absence) depending on their specific educational program as noted below.

Admission to the GEP to Doctor of Nursing Practice Pathway

Students who wish to be considered for admission to the Doctor of Nursing Practice pathway must submit their application online via NursingCAS (Centralized Application Service). The link is on the Graduate School of Nursing Web site www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the admissions office to schedule an interview. Applicants are reviewed individually on the basis of previous academic achievement, Graduate Record Examination (GRE) scores, professional experience and personal attributes.

Application
Applications to the GEP to Doctor of Nursing Practice program will be considered when all of the following have been received:

- completed application form, including two personal statements:
  - one addressing goals of study; and
  - a second addressing a residency and capstone project focus that is congruent with that of a faculty member;

- non-refundable application fee made payable to the University of Massachusetts;
- official transcripts from all colleges and universities attended;
- Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing);
- three letters of recommendation from people with whom the applicant has been in contact within the last five years:
  - one from a recent supervisor who can evaluate advanced practice nursing employment experience; and
  - two academic references;
- current resume including work experience, education, professional activities, and publications of scholarly writing;
- a clear personal statement of professional goals related to track of choice (see application form).

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

Prerequisites
Applicants must have:

- evidence of bachelor’s degree in another field or discipline;
- acceptable verbal and quantitative scores on the GRE (a combined total of at least 1,000 is preferred);
- current CPR Certification for Health Providers (BLS) by the American Heart Association;
- computer competence at the user level, including file management and word processing; and
- proficiency in reading and writing in the English language. Applicants whose native language is not English must supply their Test of English as a Foreign Language (TOEFL) results.

Tuition and Fees, Financial Aid and Academic Policies and Procedures
See page 67.
BSN to DNP Pathway

**BSN to DNP Nurse Practitioner Tracks**

Students in the Traditional RN, including Pre-Graduate’s option, are eligible for entry into the Doctor of Nursing Practice BS to DNP track pathway given successful completion of prerequisite coursework.

The BSN to DNP track population foci are:

- Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP)
- Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP)
- Family Nurse Practitioner (FNP)

**The BSN to DNP Program** is designed to prepare advanced practice nurses with a practice-doctoratedegree as adult-gerontology primary care, adult-gerontology acute care nurse practitioners, or family nurse practitioners. The graduates synthesize and integrate knowledge from the biological, psychological, social and nursing sciences. They also analyze the effect of developmental, economic, cultural, epidemiological, social, political, ethical, legal and spiritual factors influencing the care of patients with an emphasis on vulnerable and diverse populations. The graduates assess, intervene, and evaluate the responses of patients to health/illness states by applying the track competencies of advanced practice. They apply the standards of practice and evidence-based literature to make cost-effective clinical judgments in the context of quality patient outcomes. The graduates also manage health/illness care as a member of an interdisciplinary team implementing preventive and population-based health care in institutions and communities. As advanced practice nurses, they provide clinical leadership within the context of social, economic, political, legal, cultural and ethical forces that affect health care delivery, health policy and professional nursing practice. They contribute to the scholarly advancement of the nursing profession through education, research and clinical practice. The graduates embrace life-long learning through participation and leadership in professional development.

**Nurse Practitioner Track Outcomes** Consistent with the outcomes of the master’s program and upon completion of these nurse practitioner tracks, graduates will be able to use critical thinking, communication, therapeutic intervention and professional role interaction to:

- synthesize knowledge from the biological, psychological, social and nursing sciences as a foundation for advanced practice nursing as an adult-gerontology primary care nurse practitioner and/or adult-gerontology acute care nurse practitioner;
- assess, intervene and evaluate the responses of patients to acute, chronic and/or critical health/illness states over time in a variety of settings as an adult-gerontology primary care and/or adult-gerontology acute care nurse practitioner;
- utilize the standards of practice and evidence-based literature in the provision of patient care based on critical analysis and evaluation of theory and research from nursing and related disciplines;
- implement both the direct care and core competencies of the adult-gerontology primary care and/or adult-gerontology acute care in interprofessional health care settings;
- assume clinical leadership in health care delivery systems, health policy organizations, and local and national nursing organizations;
- analyze the effects of developmental, economic, cultural, epidemiological, social, political, ethical, legal and spiritual trends influencing the care of children, adults and elders;
- participate in research and other scholarly activities related to clinical nursing; and
- embrace lifelong learning through participation and leadership in professional development.
**BS to DNP Nurse Practitioner Track Options:**

**Adult-Gerontology Primary Care Nurse Practitioner Track**
The Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP) track prepares advanced practice nurses to function in ambulatory or community-based settings as an adult-gerontology primary care nurse practitioner. The focus of the track is on the delivery of primary care to the individual within the context of the family and community. The direct role component includes the management and delivery of care for adult-older adults with common episodic or chronic health problems, and the core competencies emphasizing teaching, consultation and research. Graduates of this track are eligible to take the Adult-Gerontology Primary Care Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.

**Adult-Gerontology Acute Care Nurse Practitioner Track**
The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) track prepares advanced practice nurses to function in acute or critical care areas as an adult-gerontology acute care nurse practitioner. This track focuses on the direct role component, including the management and delivery of care to acutely ill adult-older adult patients, as well as the core competencies emphasizing teaching/coaching, consultation and research. Graduates of this track are eligible to take the Adult-Gerontology Acute Care Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.

**Family Nurse Practitioner Track**
The Family Nurse Practitioner (FNP) track prepares advanced practice nurses to function in ambulatory or community-based settings as a family nurse practitioner. The focus of the program is on the delivery of primary care to the individual within the context of the family and community. The direct role component includes the management and delivery of care to children and adults with common episodic or chronic health problems, and the core competencies emphasizing teaching, consultation and research. Graduates of this track are eligible to take the Family Nurse Practitioner certification examination prepared by an approved national organization as accepted by the Board of Registration in Nursing and to apply to practice in the expanded role in Massachusetts or other states based on regulatory guidelines.
Specialties
UMass Worcester (UMW) GSN students are eligible to be enrolled in one of the optional UMass Worcester GSN specialties:

- Cancer Care
- Cardiovascular Care
- Critical Care
- Emergency Care
- Nurse Educator

A specialty consists of two three-credit didactic courses and clinical practicum(s). (Exception is Nurse Educator.) Students must take the coursework in order to be eligible for the clinical course(s). The clinical practicum requirements per specialty are as follows:

**Cancer Care:**
- 1 credit (90 clinical hours) N/NG 686B

**Cardiovascular Care:**
- 1 credit (90 clinical hours) N/NG 682B

**Critical Care:**
- 1 credit (90 clinical hours) N/NG 643B

**Emergency Care:**
- 2 credits (90 clinical hours each totaling 180 clinical hours) N/NG 724B, N/NG 725B

**Nurse Educator:**
- Optional clinical component is available for this specialty

Due to limited clinical practicums available, a maximum number of students will be accepted into each clinical portion of the specialty. Prerequisites for the specialties: Permission of Instructor

**Cancer Care**
The Cancer Care specialty prepares nurses for advanced practice roles in cancer care and education within the adult-older adult patient population. The direct role components emphasize integrating theory, research and practice essential for the advanced practice oncology nurse. The program integrates the physiological and psychosocial components of cancer care.

**Courses**
- Living with Chronic & Terminal Illness N/NG685 3 credits
- Advanced Practice Oncology Nursing N/NG686 3 credits
- Advanced Practice Oncology Nursing Practicum N/NG686B 1 credit

**Cardiovascular Care**
The Cardiovascular Care specialty prepares nurses for advanced practice roles across the continuum of care from acute/critical care settings to ambulatory/community settings. The specialty focuses on health promotion strategies in clinics, hospitals and community-based settings for men and women at risk for experiencing acute and chronic cardiovascular diseases.

**Courses**
- Advanced Practice Cardiovascular Nursing I N/NG681 3 credits
- Advanced Practice Cardiovascular Nursing II N/NG682 3 credits
- Advanced Practice Cardiovascular Nursing Practicum N/NG682B 1 credit

**Critical Care**
The Critical Care specialty prepares critical care nurses for the advanced practice nursing role to manage critically ill patients. The specialty focuses on assessment, diagnosis, stabilization, disease management, and prevention of complications of adults and older adults experiencing life threatening diseases and injuries requiring critical care knowledge and skills. Enrollment in this specialty is available to students who have recent nursing experience caring for patients in critical care settings.

**Courses**
- Advanced Practice Critical Care Nursing I N/NG 643 3 credits
Emergency Care (ON HOLD)
The Emergency Care specialty prepares nurses for advanced practice roles in urgent and emergent care management. The specialty includes introductory and advanced care didactic and clinical courses including caring for and management of unstable patients with emergent and life-threatening conditions.

Courses (ON HOLD)
Advanced Practice Nursing in Emergency Care
I N/NG 724A 3 credits
Advanced Practice Nursing in Emergency Practicum
I N/NG 724B 1 credit
Advanced Practice Nursing in Emergency Care
II N/NG 725A 3 credits
Advanced Practice Nursing in Emergency Care Practicum II
N/NG 725B 1 credit

Nurse Educator
The Nurse Educator specialty prepares nurses for advanced practice roles in faculty or staff development, providing an opportunity to acquire teaching skills and strategies that address student, program and patient outcomes as well as leadership skills to improve health care.

Courses
Advanced Nursing Science: Teaching and Curriculum Development for Nurse Educators
N/NG620 3 credits
Advanced Nursing Science: Identifying and Measuring Outcomes for Nurse Educators N/NG623 3 credits

Note: Permission of instructor is required for consideration of an independent study clinical component for this specialty.

- N772 DNP Capstone II: Project Implementation 2 credits

Spring Semester (Part Time: Take all courses listed below in Year 4)

- N773 DNP Capstone III 2 credits
- N775 Advanced APN Clinical Residency II 2 credits

Total Academic Credits 78 credits

Full Time Cost*:

- In-state residents
- New England regional
- Out of state

*Costs listed are estimates, and that tuition and fees may change at any time without prior notice.

BS to DNP Adult-Gerontology Acute Care Nurse Practitioner Track (AG-ACNP)

Year One (Part-time option: courses taken Year 1 or 2 as denoted by footnotes)

Fall Semester

- NG603A Societal Forces Influencing Graduate Nursing Education & Practice 3 credits
- NG603B IP Population Community Service Learning (1) Practicum [CSL] (taken Fall through Spring) (1) 1 credit
- NG604 Translating & Integrating Scholarship into Practice (2) 3 credits
- NG613 Advanced Pathophysiology (1) 3 credits
- N719 Genetics, Genomics, Pharmacogenomics (1) 3 credits

Spring Semester

- NG603B IP Community Service Learning Practicum (continued from Fall) (1) 1 credit
NG614 Advanced Pharmacotherapeutics (1) 3 credits
N704 Principles of Epidemiology (2) 3 credits
N615 Advanced Health Assessment (2) 3 credits

**Summer Semester**

N709 DNP Capstone I: Advisement (Summer Yr 2 through Summer Year 3)[2] IP
N710 Clinical Scholarship & Analytics (2) 3 credits
N769 Leadership Seminar: Transformative Leadership (1) 1 credit
NXXX Elective (may take another semester) (1) 3 credits

**Full Time Cost***:
- In-state residents
- New England regional
- Out of state

**Year Two** (Part Time: Take all courses listed below in Year 3)

**Fall Semester**

N630A Adv. Nursing Science: Adult Gerontology Acute Care 6 credits
N630B Adv. Nursing Science: Adult Gerontology Acute Care Nurse Practitioner Theory I
N641A Advanced Nursing Science: Adult-Gerontology Acute Care Nurse Practitioner Theory II 6 credits
N641B or Adv. Nursing Science: Adult Gerontology Acute Care Nurse Practitioner Clinical Practicum II
N770 DNP Leadership Practicum I 1 credit
N771 DNP Leadership Practicum I 1 credit
N7XX Health Promotion and Disease Prevention Seminar IP

**Spring Semester** (Part Time: Take all courses listed below in Year 3)

N641A Advanced Nursing Science: Adult-Gerontology Acute Care Nurse Practitioner Theory II 6 credits
N641B or Adv. Nursing Science: Adult Gerontology Acute Care Nurse Practitioner Clinical Practicum II 3 credits
N771 DNP Leadership Practicum I 1 credit
N7XX Health Promotion and Disease Prevention Seminar IP

**Summer Semester** (Part Time: Take all courses listed below in Year 3)

N709 DNP Captstone I: Advisement (con’t from Summer Yr 2 to Summer Year 3) 2 credits
N715 Advanced Statistical Application for the APN 3 credits
N723 Quality & Safety in Health Care Organizations 3 credits
N641C Adv. Nursing Science: Adult Gerontology Acute Care Nurse Practitioner Clinical Practicum III 1 credit

**Full Time Cost***:
- In-state residents
- New England regional
- Out of state

**Year Three** (Part Time: Take all courses listed below in Year 4)
### Fall Semester

- **N707** Biomedical Informatics 3 credits
- **N706** Health Policy & Ethics for Healthcare Professionals 3 credits
- **N708** Organizational Systems & Health Care Financing 3 credits
- **N774** Advanced APN Clinical Residency I 2 credits
- **N772** DNP Capstone II: Project Implementation 2 credits

### Spring Semester (Part Time: Take all courses listed below in Year 4)

- **N773** DNP Capstone III: Evaluation 2 credits
- **N775** Advanced APN Clinical Residency II 1 credit

Total Academic Credits 78 credits

### Full Time Cost*:  
- In-state residents  
- New England regional  
- Out of state  

*Costs listed are estimates, and that tuition and fees may change at any time without prior notice.

### BS to DNP Family Nurse Practitioner Track (FNP)

#### Year One (Part-time option: courses taken Year 2 or 3 as denoted by footnotes)

**Fall Semester**

- **NG603A** Societal Forces Influencing Graduate Nursing Education & Practice(1) 3 credits
- **NG603B** IP Population Community Service Learning (1)  
  Practicum [CSL] (taken Fall through Spring)  IP
- **NG604** Translating & Integrating Scholarship into Practice (2) 3 credits
- **NG613** Advanced Pathophysiology (1) 3 credits
- **N719** Genetics, Genomics, Pharmacogenomics (2) 3 credits

**Spring Semester**

- **NG603B** IP Community Service Learning Practicum (continued from Fall) (1) 1 credit
- **NG614** Advanced Pharmacotherapeutics (1) 3 credits
- **N704** Principles of Epidemiology (2) 3 credits
- **N615** Advanced Health Assessment (2) 3 credit

**Summer Semester**

- **N709** DNP Capstone I: Advisement (Summer Yr 2 through Summer Year 3)(2)  IP
- **N710** Clinical Scholarship & Analytics (2) 3 credits
- **N769** Leadership Seminar: Transformative Leadership (1) 1 credit
- **NXXX** Elective (may take another semester) (1) 3 credits

### Full Time Cost*:  
- In-state residents  
- New England regional  
- Out of state
### Year Two (Part Time: Take all courses listed below in Year 3)

**Fall Semester**
- **N660A**  Adv. Nursing Science: Family Nurse Practitioner Theory I 6 credits
- **N660B**  Adv. Nursing Science: Family Nurse Practitioner Clinical Practicum I 3 credits
- **N770**  DNP Leadership Practicum I 1 credit
- **N7XX**  Health Promotion and Disease Prevention Seminar IP

**Spring Semester (Part Time: Take all courses listed below in Year 3)**
- **N661A**  Advanced Nursing Science: Adult-Gerontology Primary Care Nurse Practitioner Theory II 6 credits
- **N661B**  Adv. Nursing Science: Family Nurse Practitioner Clinical Practicum II 3 credits
- **N771**  DNP Leadership Practicum I 1 credit
- **N7XX**  Health Promotion and Disease Prevention Seminar IP

**Summer Semester (Part Time: Take all courses listed below in Year 3)**
- **N709**  DNP Capstone I: Advisement (con’t from Summer Yr 2 to Summer Year 3) 2 credits
- **N715**  Advanced Statistical Application for the APN 3 credits
- **N723**  Quality & Safety in Health Care Organizations 3 credits
- **N661C**  Adv. Nursing Science: Family Nurse Practitioner Clinical Practicum III 2 credits

**Full Time Cost***:
- In-state residents
- New England regional
- Out of state

### Year Three  (Part Time: Take all courses listed below in Year 4)

**Fall Semester**
- **N707**  Biomedical Informatics 3 credits
- **N706**  Health Policy & Ethics for Healthcare Professionals 3 credits
- **N708**  Organizational Systems & Health Care Financing 3 credits
- **N774**  Advanced APN Clinical Residency I 2 credits
- **N772**  DNP Capstone II: Project Implementation 2 credits

**Spring Semester (Part Time: Take all courses listed below in Year 4)**
- **N773**  DNP Capstone III 2 credits
- **N775**  Advanced APN Clinical Residency II 2 credits

Total Academic Credits 82 credits

**Full Time Cost***:
- In-state residents
- New England regional
- Out of state
*Costs listed are estimates, and that tuition and fees may change at any time without prior notice.

**Doctor of Nursing Practice: Post-master’s Course Sequence for NPs**

**Year One**  (Part time: Please Check with DNP Program Director on alternative progression options)

**Fall Semester**
- NG603A Societal Forces Influencing Graduate Nursing Education & Practice  3 credits
- NG603D IP Population Community Service Learning Practicum [CSL] (taken Fall through Spring)  IP
- N719 Genetics, Genomics, Pharmacogenetics  3 credits

**Spring Semester**
- N704 Principles of Epidemiology (2)  3 credits
- NG603D IP Population Community Service Learning (1) Practicum [CSL] (taken Fall through Spring) (1)  IP

**Summer Semester**
- N709 DNP Capstone Project Prospectus (2) (con’t through summer Yr 2)  IP
- N710 Clinical Scholarship and Analytic Methods (2)  3 credits
- N769 Leadership Seminar: Transformative Leadership (1)  1 credit

**Full Time Cost***:
- In-state residents
- New England regional
- Out of state

**Year Two**  (Part time: Please Check with DNP Program Director on alternative progression options)

**Fall Semester**
- N770 DNP Leadership Practicum I  1 credit
- N706 Health Policy for Health Care Professionals  3 credits
- N707 Biomedical Informatics  3 credits

**Spring Semester**
- N709 DNP Capstone Project Prospectus (con’t from Summer yr 1 through summer Yr 2)  IP

**Summer Semester**
- N723 Quality & Patient Safety In Healthcare Organizations  3 credits
- N709 DNP Captstone I: Advisement (con’t from Summer Yr 1 to Summer Year 2)  2 credits
- N715 Advanced Statistical Application for the APN  3 credits

**Full Time Cost***:
- In-state residents
New England regional
Out of state

Year Three  (Part time: Please Check with DNP Program Director on alternative progression options)

Fall Semester
N708  Organizational Systems & Health Care Financing  3 credits
N774  Advanced APN Clinical Residency I  2 credits
N772  DNP Capstone II: Project Implementation  2 credits

Spring Semester (Part Time: Take all courses listed below in Year 4)
N773  DNP Capstone III  2 credits
N775  Advanced APN Clinical Residency II  2 credits

Total Post-Master’s DNP Academic Credits 40 credits

Full Time Cost*:
In-state residents
New England regional
Out of state

Doctor of Nursing Practice Post-master’s Course Sequence for Nurse Administrator

Year One  (Part time: Please Check with DNP Program Director on alternative progression options)

Fall Semester
NG603A  Societal Forces Influencing Graduate Nursing Education & Practice  3 credits
NG603D  IP Population Community Service Learning
Practicum [CSL] (taken Fall through Spring)  IP
N7XX  Advanced Nurse Executive Leadership (Nurse Admin only)  3 credits

Spring Semester
N704  Principles of Epidemiology (2)  3 credits
NG603D  IP Population Community Service Learning (1)
Practicum [CSL] (taken Fall through Spring) (1)  IP

Summer Semester
N709  DNP Capstone Project Prospectus (2) (con’t through summer Yr 2)  IP
N710  Clinical Scholarship and Analytic Methods (2)  3 credits
N769  Leadership Seminar: Transformative Leadership (1)  1 credit

Full Time Cost*:
In-state residents
New England regional
Out of state
Year Two (Part time: Please Check with DNP Program Director on alternative progression options)

Fall Semester
- N770 DNP Leadership Practicum I 1 credit
- N706 Health Policy for Health Care Professionals 3 credits
- N707 Biomedical Informatics 3 credits

Spring Semester
- N709 DNP Capstone Project Prospectus (con’t from Summer yr 1 through summer Yr 2) IP
- N771 DNP Leadership Practicum I 1 credit

Summer Semester
- N723 Quality & Patient Safety In Healthcare Organizations 3 credits
- N709 DNP Capstone I: Advisement (con’t from Summer Yr 1 to Summer Year 2) 2 credits
- N715 Advanced Statistical Application for the APN 3 credits

Full Time Cost*:
- In-state residents
- New England regional
- Out of state

Year Three (Part time: Please Check with DNP Program Director on alternative progression options)

- N708 Organizational Systems & Health Care Financing 3 credits
- N774 Advanced Residency I 2 credits
- N772 DNP Capstone II: Project Implementation 2 credits

Spring Semester (Part Time: Take all courses listed below in Year 4)
- N773 DNP Capstone III 2 credits
- N775 Advanced Residency II 2 credits

Total Post-Master’s DNP Academic Credits 40 credits

Full Time Cost*:
- In-state residents
- New England regional
- Out of state
Admission to the Doctor of Nursing Practice Pathway

Students who wish to be considered for admission to the Doctor of Nursing Practice pathway must submit their application online via NursingCAS (Centralized Application Service). The link is on the Graduate School of Nursing Web site www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the admissions office to schedule an interview. Applicants are reviewed individually on the basis of previous academic achievement, Graduate Record Examination (GRE) scores, professional experience and personal attributes.

Application

Applications to the Doctor of Nursing Practice program will be considered when all of the following have been received:

• completed application form, including two personal statements:
  o one addressing goals of study; and
  o a second addressing a residency and capstone project focus that is congruent with that of a faculty member;
• non-refundable application fee made payable to the University of Massachusetts;
• official transcripts from all colleges and universities attended;
• Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing);
• three letters of recommendation from people with whom the applicant has been in contact within the last five years:
  o one from a recent supervisor who can evaluate advanced practice nursing employment experience; and
  o two academic references;
• current resume including work experience, education, professional activities, and publications of scholarly writing;
• one example of scholarly writing (i.e., publication, scholarly paper);
• professional advanced practice nursing portfolio that demonstrates:
  o for the Nurse Practitioner track, attainment of NONPF competencies in the area of nurse practitioner specialization; or
  o for the Nurse Administrator track, attainment of the nurse executive competencies established by the American Organization of Nurse Executives; and
• a clear personal statement of professional goals related to track of choice (see application form).

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

Prerequisites

Applicants must have:

• evidence of unrestricted Massachusetts licensure as a registered nurse and/or nurse practitioner;
• master’s degree in nursing from a program accredited by National League of Nursing Accrediting Commission (NLNAC), or the Commission on Collegiate Nursing Education (CCN) or related field (Nurse Administrator Track only);
• a GPA of 3.0 or better in the baccalaureate program and/or certificate of completion program;
• a GPA of 3.2 or better in the Master of Science in Nursing program or Master of Nursing program;
• advanced practice nursing certification as an adult nurse practitioner, adult acute care nurse practitioner, family nurse practitioner, gerontology nurse practitioner, pediatric nurse practitioner or women’s health nurse practitioner; and/or experience as a nurse manager or nurse executive (recommended, but
not required, for nurse administrator applicants);
• acceptable verbal and quantitative scores on the GRE (a combined total of at least 1,000 is preferred);
• current CPR Certification for Health Providers (BLS) by the American Heart Association;
• computer competence at the user level, including file management and word processing; and
• proficiency in reading and writing in the English language. Applicants whose native language is not English must supply their Test of English as a Foreign Language (TOEFL) results.

Tuition and Fees, Financial Aid and Academic Policies and Procedures
See page 67.

The Pre-Graduate Option
The Pre-Graduate Option into the Master of Science program is designed for applicants who are registered nurses with an associate’s degree or diploma in nursing and a bachelor’s degree or higher degree in a field other than nursing. This track offers alternative means of qualifying for admission to the GSN at UMass Worcester, based on transfer of academic courses and course enrollment.

Although the Pre-Graduate Option does not grant a bachelor’s degree in nursing, it can enable students who are nurses with other degrees to meet the criteria for admission into the Master of Science program. The Pre-Graduate Option does not assign credit equivalencies to the prerequisite coursework because this track does not grant a bachelor’s degree in nursing. Instead, the Pre-Graduate Option grants exemptions for the specific Master of Science program admission requirement of a bachelor’s degree in nursing. Accepted students are required to take NG519A Nursing IV: Clinical Capstone: Leadership and Management and NG 603C IP Population Health Clerkship if they have not done so already. See the Master of Science in Nursing Program or Doctor of Nursing Practice Program for further information about the program’s curriculum, outcomes, tracks and specialties, course sequences, admissions and selected policies and procedures. See Course Descriptions for detailed information about GSN courses.

Admission to the Pre-Graduate Option
Students who wish to be considered for admission to the Pre-Graduate Option must submit their application online via NursingCAS (Centralized Application Service). The link is on the Graduate School of Nursing Web site at www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the admissions office to schedule an interview. Applicants are reviewed individually on the basis of previous academic achievement, Graduate Record Examination (GRE) scores, professional experience and personal attributes.

Application
Applications to the Pre-Graduate Option into the Master of Science program will be considered when all of the following have been received:
• completed application form, including a clear personal statement of professional goals related to track of choice (see application form);
• non-refundable application fee made payable to the University of Massachusetts;
• official transcripts of college graduation from an accredited institution and all other colleges and universities attended, including prerequisite courses if taken outside of a degree program;
• evidence of an associate’s degree or diploma in nursing (NLNAC accredited) and a bachelor’s degree or higher degree in a field other than nursing from an accredited program;
• Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing
• three letters of recommendation from people with whom the applicant has been in contact within the last five years:
• at least one letter of reference must be from a professional nurse who has been recently responsible for evaluating the applicant’s professional nursing practice;
• a second letter of reference must be an academic reference from a person with an advanced degree; and
• the third letter should be a professional letter of reference related to academic, work or volunteer activities; and current resume including work experience, education and professional activities.

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

Prerequisites
The applicant must have:
• an unrestricted Massachusetts license as a registered nurse with a degree earned from a program accredited by the National League for Nursing Accrediting Commission (NLNAC);
• an undergraduate grade point average of 3.0 (B) or better;
• completed undergraduate courses in health assessment and nursing leadership (or take prerequisite course NG519A)
• college level statistics course (with a grade of C or better)
• current CPR Certification for Health Providers (BLS) by the American Heart Association;
• computer competence at the user level, including file management and word processing; and
• proficiency in reading and writing in the English language. Applicants whose native language is not English
PhD in Nursing Program

Philosophy
The focus of the University of Massachusetts Worcester Graduate School of Nursing PhD program is on the development and transformation of scholars who will lead the discipline of nursing. We recognize that students come to us with their own experiences, questions, knowledge and skills. Our goal is to help students to expand their horizons through seeking new phenomena, raising further questions for scientific inquiry, applying qualitative and quantitative research methods and fulfilling their professional responsibility to nursing and society. Our program is influenced by the cognitive philosophy of Bernard Lonergan, a Canadian philosopher (http://www.iep.utm.edu/lonergan/). We focus on the scholar as a human person with her/his own emerging questions who undertakes doctoral inquiry as a means to answer those questions. We engage the emerging scholar in a transformative process of wonder and discovery, self-reflection, critical thinking and genuine dialogue with other students and faculty. We emphasize the need for scholarship that addresses the broader conditions that influence human health. Graduates will be attentive, intelligent, reasonable and responsible when developing knowledge and making ethical decisions. We envision that our graduates will make scholarly contributions to the cumulative progression of scientific knowledge through their ongoing research.

Core Values
Our scholarly endeavors and relations with others are built upon the values of the University of Massachusetts Medical School and the Graduate School of Nursing. The Nursing PhD Program highly values and places additional emphasis upon:

- Scientific integrity
- Transparency
- Generosity
- Cultural humility
- Self-reflective inquiry
- Commitment to working toward the human good in society

Program Outcomes
The Nursing PhD Program prepares students for careers in teaching and research with the ability to conduct research within a multidisciplinary milieu. At the completion of the PhD program, graduates will:

- Apply philosophical and theoretical principles to scholarly inquiry
- Critique and synthesize knowledge to advance nursing science and human health
- Design, conduct and disseminate independent and collaborative research
- Demonstrate the core program values in all scholarly endeavors
- Assume leadership roles in research, education, policy, administration and/or professional practice.

The core and related course work meets the standards established by the American Association of Colleges of Nursing (AACN) outlined in the Research-Focused Doctoral Programs in Nursing: Pathways to Excellence (2010). Graduates will be novice researchers with a strong foundation in nursing inquiry prepared to assume investigators, academic, and leadership roles and contribute to the ongoing development of nursing science, the preparation of future nurses, the improvement of human health, and the continual evolution of professional nursing practice.

Program of Study:
PhD Program Core Curriculum
There are two pathways to the PhD degree: MS to PhD and BS to PhD.

MS to PhD
The MS to PhD program consists of a minimum of 57 credit hours including:

12 credits in nursing knowledge and theory
- N800 Philosophy of Nursing Science
- N803 Theory
- N706 Health Policy
- N814 Genomics

23 credits in research methods, statistics and research skills
- N707 Bioinformatics
- N801 Qualitative Research Methods
- N802 Quantitative Methods
- N804 Measurement
- N813 Grant and Proposal Writing
- N815 Statistical Analysis of Data
- N890 Advanced Statistics
- NXX Advanced Methods Elective

The core and related course work meets the standards established by the American Association of Colleges of Nursing (AACN) outlined in the Research-Focused Doctoral Programs in Nursing: Pathways to Excellence (2010). Graduates will be novice researchers with a strong foundation in nursing inquiry prepared to assume investigators, academic, and leadership roles and contribute to the ongoing development of nursing science, the preparation of future nurses, the improvement of human health, and the continual evolution of professional nursing practice.
1 credit for PhD Practicum
   N810 PhD Practicum

18 credits for dissertation research

Students take one additional 3 credit elective of choice to complement the student’s individual program of study.

BS to PhD
The BS to PhD program includes the courses listed above plus 19 credits in the Master’s Core Curriculum (taken during year one) and an additional elective for a minimum of 76 credit hours. The Master’s Core Courses include:

19 credits in Master’s core:
   N603a Societal Forces
   N603b Community Service Learning Practicum
   N604 Translating Scholarship into Practice
   N613 Advanced Pathophysiology
   N614 Advanced Pharmacotherapeutics
   N704 Epidemiology
   N814 Genomics

In addition all students are also required to successfully complete a practicum, comprehensive examination, dissertation proposal defense, and defense of the completed dissertation.

Tracks to the PhD in Nursing degree
The GSN offers several tracks to the PhD:

The GEP to PhD Track admits students who have completed the first year of the GSN’s Graduate Entry Pathway Program.

The Bachelor’s to PhD Track admits students who are registered nurses with a bachelor’s degree.

The Master’s to PhD Track admits students with earned master’s degrees; in Nursing or related field.

GEP to PhD Track:
The purpose of the GEP to PhD Track is to accelerate the research careers of nurse scientists. The track offers an opportunity for enrolled students to complete the PhD in Nursing in a period of five to six years. Graduates are expected to develop independent programs of research and will receive a PhD in Nursing degree. There is no master’s degree offered through this program. Students interested in a clinically focused career are not candidates for this option.

Bachelor’s to PhD Track
The purpose of the Bachelor’s to PhD Track is to accelerate the research careers of nurse scientists. The track offers an opportunity for enrolled students to complete the PhD in Nursing in a period of four to six years. Graduates are expected to develop independent programs of research and will receive a PhD in Nursing degree. There is no master’s degree offered through this program. Students interested in a clinically focused career are not candidates for this option.

Master’s to PhD Track (open to nurses and non-nurses)
The Master’s to PhD Track prepares individuals with a master’s degree for careers in the conduct of clinical and translational research within multidisciplinary settings.

Comprehensive Examination
All PhD students must pass the comprehensive examination before progressing to their dissertation research. The exam is taken after completion of all course work. The director of the PhD in Nursing program will inform students when they have successfully passed the examination. At his or her discretion, the director of the PhD program may permit students who fail the exam to retake it one time only.

Doctoral Dissertation
Candidates for the PhD degree must complete an acceptable written and oral defense of their dissertation. The dissertation qualifies for acceptance when it satisfies the following
criteria:

- demonstrates the candidate’s intellectual competence;
- makes an original and valid contribution to nursing science; and
- represents an individual achievement and is the product of independent research.

Candidates conduct their dissertation research under the supervision of dissertation committees. All members of a dissertation committee must approve and sign off on a candidate’s dissertation proposal. Candidates then complete the dissertation research; submit an acceptable written dissertation and then with the approval of the committee schedule a final oral examination (defense of dissertation). Attendance at the final oral examination is open to the academic community. However, only the three members of the dissertation committee may cast a vote. A unanimous vote is required for the candidate to pass the final oral examination.

Dissertation Credits
All students must enroll for 18 dissertation credits. No student is exempt from this requirement. Normal tuition rates will apply.

N704  Principles of Epidemiology 3 credits
Summer Semester
N814  Genomics for Clinical Practice & Research 3 credits

Full Time Cost*:
In-state residents
New England regional
Out of state

Year Two
Fall Semester
N800  History and Philosophy of Nursing Science  3 credits
N801  Qualitative Research Methods  3 credits
N810  PhD Practicum (please consult advisor before registering  1 credit
Spring Semester
N802  Quantitative Research Methods  3 credits
N803  Theory  3 credits
N815  Statistical Analysis of Data  3 credits

**Summer Semester**

N804  Measurement and Instrumentation in Clinical Research  3 credits

**Full Time Cost***:

- In-state residents
- New England regional
- Out of state

**Year Three**

**Fall Semester**

N706  Health Policy  3 credits
N707  Bioinformatics  3 credits

**Spring Semester**

N808  Critical Health Policy Issues Seminar  3 credits
N813  PhD Grant & Proposal Writing  2 credits

**Summer Semester**

N888  Comprehensive Exam  0 credits

**Full Time Cost***:

- In-state residents
- New England regional
- Out of state

**Year Four**

**Fall Semester**

N809  Dissertation Seminar  0 credits
N899  Dissertation Credits  9 credits

**Spring Semester**

N809  Dissertation Seminar  0 credits
N899  Dissertation Credits  9 credits

- Final Oral Defense of Dissertation  0 credits
- Total Academic Credits (minimum)  76 credits

Important Note: In addition to the above core coursework, Bachelor’s to PhD students must take AT LEAST THREE 3-credit electives. One elective must be an advanced methods elective. Electives may be taken concurrently in any semester after approval by the student’s faculty advisor. Cost of electives is not included and will be added in the years they are taken.

**Full Time Cost***:

- In-state residents
- New England regional
- Out of state

*Please note that costs listed are estimates, and that tuition and fees may change at any time without prior notice

Admission to the PhD in Nursing Program

Students who wish to be considered for admission into the PhD program must submit their application on-line via the Nursing Centralized Application Service (Nursing CAS). The link to the Nursing CAS application is on the Graduate School of Nursing Web site at www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the PhD Program Director to schedule an interview. Admission to the PhD in Nursing Program is based on the faculty’s overall appraisal of the applicant’s ability to undertake doctoral study and of his or her potential contributions to nursing science. Acceptable verbal and quantitative scores on the GRE and a GPA of 3.0 or better are required. Applicants for GEP to PhD must satisfy all admission requirements for GEP program.

Application to the PhD program will be considered when all of the following have been received:

- completed application form, including a clear personal statement demonstrating the goal of becoming a nurse scientist;
- non-refundable application fee made payable to the University of Massachusetts;
- official transcripts from all colleges and universities attended;
- completion of the admissions essay (see application form)
- Two academic letters of reference;
- Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing
- participation in an admission interview;
- current resume including work experience, education, professional activities, and publications of scholarly writing;

PhD Academic Policies and Procedures

For a full description of GSN policies view the GSN Student Handbook at www.umassmed.edu/gsn/current_students/index.aspx.

Statute of Limitations

Completion of all degree requirements within the statute of limitations: five (5) years for students entering the program with a master’s degree and six (6) years for students entering with a baccalaureate degree or from the Graduate Entry Pathway
program. A doctoral student may be granted additional time to complete his/her degree program by the director of the PhD program, provided satisfactory and reasonable progress is being made.

**Student Status**

Full time students must be registered for a minimum of nine (9) credit hours for that semester by two weeks before the start of the semester and must maintain a minimum enrollment of 9 credit hours during the semester in order to maintain active student status (eligibility for course credit, malpractice insurance, financial aid, etc.).

Students taking less than nine (9) credits per semester are considered part-time. Part-time students must be registered for a minimum of five (5) credit hours each semester to be eligible for financial aid.

**Continuous Enrollment**

Students are required to maintain continuous enrollment each semester until program requirements are complete. Failure to be properly enrolled may result in the student being administratively withdrawn from the program.

Graduate Entry Pathway students are enrolled full-time, that is, with the full credit load in the Fall, Spring and Summer semesters in the Pre-licensure year.

**Maximum Credit Load**

A graduate student in the Master’s or Doctoral Programs may register for up to 18 credits each semester. Students who wish to register for more than the maximum credit load must secure written permission from their faculty advisor.

**Transfer of Credits**

Credit for courses equivalent to required GSN courses may be transferred from other institutions with permission. If a doctoral student requests a transfer course to meet an elective requirement, the course MUST complement the student’s program of study. Students who wish to take an elective at another University of Massachusetts campus may do so by completing the UMass Graduate Course Exchange Registration Form that is available in the Registrar’s Office. The signatures of the GSN faculty research advisor and the faculty of record at the other campus are required. The cross-registration form is returned to the Registrar’s Office to ensure continuous enrollment and active student status. For PhD students, transfer of more than 9 credits from other UMass campuses will be evaluated on an individual basis by the Program Director and the faculty research advisor. In all cases involving transfer of a course from another school, the student receives credit for the transfer courses, but the grades are not calculated in the UMW GPA.

**PhD Courses**

**N800 History and Philosophy of Nursing Science**

This course is designed to prepare students to systematically analyze epistemological, ontological and metatheoretical perspectives in the philosophy of science, while also considering the implications for scientific inquiry, theory development and knowledge development in nursing. 3 credits Prerequisites: PhD program matriculation or permission of instructor.

**N801 Qualitative Research Methods**

The focus of this course is on the use of qualitative research methods to build substantive knowledge in nursing. Issues in qualitative research are identified and discussed, and critical analysis of traditional and emerging designs debated. Selected qualitative research designs are presented and the philosophical underpinnings and specific data collection and analysis methods associated with each design are identified, discussed, compared, contrasted and analyzed. Research from nursing and other fields is critiqued. Experiential learning methods and techniques include design, preparation and presentation of a research project. 3 credits Prerequisites: PhD program matriculation or permission of instructor.

**N802 Quantitative Research Methods**

This course provides students with an advanced study of research designs and methods used in quantitative nursing research. Analyses of quantitative methods that are currently used in biomedical, behavioral, social and nursing sciences are explored. 3 credits Prerequisites: N800 and N801, or permission of instructor.

**N803 Theory**

This course focuses on the critical analysis of theories, concepts, frameworks, and models for...
research. Emphasis is on analysis, including application of criteria for evaluating concepts in research and theory development. 3 credits Prerequisites: N800 and N801, or permission of faculty of record.

**N804 Measurement and Instrumentation in Clinical Research**
This is an advanced, graduate-level course that focuses on measurement theory and the processes of instrument evaluation, refinement and development. This course explores the use of quantitative and qualitative procedures to measure clinically important variables. In addition, emphasis is posited upon the interaction of conceptual, methodological, cultural and pragmatic considerations that are essential to understand when measuring variables among clinical populations. 3 credits Prerequisites: N801 and N802, or permission of instructor.

**N809 Dissertation Seminar**
The purpose of the dissertation seminar is to assist students who have completed their course work and passed the comprehensive examination to sustain momentum in the completion of their dissertation proposal. The seminar provides regular, organized opportunities for students to present dissertation proposal work in progress to peers and faculty mentors. This seminar is designed to augment (not replace) the one-to-one advising that each student receives from his/her dissertation advisor. Dissertation seminar is designed to run concurrently with N899 dissertation advisement. A minimum of two semesters of dissertation seminar is required. Participation beyond two semesters is required for all students until proposal completion. 0 credits Prerequisite: Must pass the comprehensive examination.

**N810 Doctoral Practicum**
This is an advanced graduate-level course which provides students with a mentored practicum experience in at least one of five key areas: research, leadership, education, scientific integrity, scholarship and team science. The practicum experience is highly individualized and designed to develop expertise in a selected area of PhD scholarship. 1 credit.

**N813 PhD Grant & Proposal Writing**
This course emphasizes a synthesis of the course content in the PhD program through development of a formal grant proposal. It explores the elements of grant writing, proposal development and ethical considerations related to human subjects' research. Students will be guided in the development of an individual grant proposal eligible for submission to a funding sponsor. 2 credits

**N814 Genomics for Clinical Practice & Research**
This course provides the foundation to use genetics and genomic concepts in advanced practice and clinical research. The principles of human and molecular genetics including variations, patterns of inheritance and multifactorial inheritance will be discussed. Gene action and expression, cytogenetics, the Human Genome Project, genetics terminology and basic principles of laboratory methods used in genetics and genomics will be examined. The evolving principles of epigenetics, nutrigenomics, and pharmacogenomics in patient care and research will be explored with attention given to the associated ethical, legal and social implications. Inherited and acquired health conditions will be used to illustrate the impact of genetics and genomics on nursing practice and on opportunities for research. 3 credits

**N815 Statistical Analysis of Data**
This course provides the student with an introduction to inferential statistics. Emphasis is placed on practical application, rather than mathematical theory. Topics include t-tests, analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA and mixed ANOVA, multivariate analysis of variance (MANOVA), correlations and scatter plots and regression analyses. 3 credits Prerequisites: N815 or

**N890 Advanced Statistics**
This course builds on N815 Statistical Analysis of Data to provide in-depth instruction on practical applications of multivariate data analysis, focusing on statistical issues and techniques that students are likely to encounter in their research. Topics include pre-analysis data screening, assessment of model fit for analysis of variance and covariance (ANOVA/ANCOVA) and linear regression, model selection techniques, repeated measures ANOVA, multivariate analysis of variance (MANOVA) and logistic regression. 3 credits Prerequisites: N815 or
permission of instructor.

**N895 Independent/Directed Study**

This course is open to PhD students. The goal of independent study is to complement the PhD student’s program in a way that helps him/her develop additional knowledge and skills that could not be reasonably gained with a traditional course offering. Plans for study must be submitted in advance of registration on the Independent Study Advance Registration form obtained from the Graduate School of Nursing. The student must meet with the faculty member of record to establish written goals, objectives and evaluation criteria for the independent study. Upon establishing the goals and objectives, the number of credits will be determined by the faculty member in consultation with the PhD program director. The student may take more than one independent study, but no more than nine credit hours may be applied toward the PhD degree. 1 to 3 credits

**Prerequisite:** Agreement with course faculty.

**N899 Dissertation Credits**

Students are required to take a minimum of 18 dissertation credits. Most students elect to take three to six credits per semester for one to two years until completion of the dissertation. This component of the PhD program requires students to work independently on a research study in close collaboration with their dissertation advisor and committee members. N809 Dissertation Seminar is taken concurrently with dissertation credits until the oral defense of the dissertation proposal is completed. Prerequisites: completion of all required and elective PhD coursework, and passing the comprehensive examination. Note: N706 and N707- please see DNP courses for description.

**Master of Science in Nursing Degree**

The Master of Science in Nursing curricula incorporates theory, clinical laboratory and practica in a graduate nursing track. The common course of study for each track includes graduate core courses in theories, research process and design, and societal forces that influence interprofessional nursing practice. Advanced practice nursing core courses include advanced pathophysiology, advanced health assessment and advanced pharmacotherapeutics. The focus of a particular track and the courses specifically needed to develop expertise in each vary, as detailed in the course sequences. The master’s program also offers optional courses in specialty areas of practice which include cancer care, cardiovascular care, critical care, emergency care (on hold), and nursing education. Full- and part-time studies are available in the master’s pathway program.

**Master’s Pathway Program Outcomes**

The master’s pathway program prepares advanced practice nurses as professional registered nurses or nurse educators. Graduates synthesize and integrate knowledge from the biological, psychological, social and nursing sciences. They also analyze the effect of developmental, economic, cultural, epidemiological, social, political, ethical, legal and spiritual factors influencing the care of patients with an emphasis on vulnerable and diverse populations. Graduates assess, intervene, and evaluate patients and families’ responses to health/illness states by applying the competencies of the AACN master’s program essentials. They apply the standards of practice and evidence-based literature to make cost-effective clinical judgments in the context of quality patient outcomes within their scope of practice.

The graduates also manage care as a member of an interprofessional team providing preventive and population-based health care in institutions and communities. As graduate prepared nurses, they provide clinical leadership within the context of social, economic, political, legal, cultural and ethical forces that affect health care delivery, health policy and professional nursing practice. They contribute to the scholarly advancement of the nursing profession through education, research and clinical practice. Graduates embrace life-long learning through participation and leadership in professional development.

**Tracks to the Master of Science Degree Pathway**

Within the GSN master’s pathway program, tracks that lead to the preparation of a master’s in nursing with a concentration in population health (available to GEP or BS to MS applicants only) or nurse educator. The nurse educator track is available to traditional master’s
The Graduate Entry Pathway to Master’s Degree Track

The Graduate Entry Pathway (GEP) is designed as an alternate track into the Master of Science in Nursing program for applicants who have a bachelor’s degree in a field other than nursing, who are not registered nurses and who seek a master’s degree in nursing to become a nurse practitioner.

The GEP to master’s track is a full-time program lasting a minimum of three years that:

• prepares professional nurses for generalist entry-level practice through initial licensure by examination in Massachusetts as a registered nurse;

• establishes the foundation for competent professional practice as a registered nurse with a requirement of 1000 RN practice hours by graduation; and equips students for studies in a track area in the Master of Science in Nursing program.

GEP graduates receive a Master of Science degree.

GEP Summary of Study

GEP Year One: Pre-licensure Component
The academic calendar runs from mid-August to the end of July. During this period, students complete the courses and clinical experiences required for licensure as a registered nurse. Upon successful completion of pre-licensure requirements and enrollment in the subsequent 500- and 600-level courses in the first part of the GEP Year Two, the GSN will issue qualifying students a Certificate of Completion so that they may sit for the National Certification Licensing Examination for Registered Nurses (NCLEX-RN). The Certificate of Completion is not the equivalent of an academic degree, and is awarded in the Commonwealth of Massachusetts only to students who are enrolled in a graduate degree program.

GEP Year One Outcomes
Consistent with the terminal outcomes of the Master of Science in Nursing program, upon completion of Year One of the Graduate Entry Pathway, students will be able to:

• think critically for the purposes of exercising evidence-based clinical judgment and making ethical decisions;

• provide clinical nursing care using the core competencies and knowledge of a professional registered nurse;

• communicate effectively with individuals, families and communities of diverse backgrounds and with colleagues in other professional disciplines;

• demonstrate leadership skills to enhance health care delivery and promote professional nursing; and exemplify the personal and professional values and characteristics consistent with the professional nursing role.

GEP Year Two
Students transition into Master of Science coursework. In the fall semester, in addition to traditional master’s (600-level) courses, GEP students take NG603C Interprofessional Population Health Clerkship. In the Fall and spring semester, GEP students take NG522 Transition to Professional Nursing.

GEP Year Three
In the final year of the GEP program, the plan of study will involve course work in the concentration in population health.

GEP students are expected to complete 1,000 hours total (500 hours is required prior to the start of the clinical year) of work as a registered nurse before the end of their final semester in addition to their required clinical practica.

Transitioning to Master’s Pathway Courses, Tracks and Specialties
The master’s curriculum incorporates theory, clinical laboratory and practica in a graduate nursing track. The common course of study for each track includes graduate core courses in theories, research process and design, epidemiology, genetics and societal forces that influence interprofessional nursing practice. The focus of a particular track and the courses specifically needed to develop expertise in each vary, as detailed in the course sequences.
### GEP TO MS Course Sequence:

**Master’s in Nursing with Concentration in Population Health**

**GEP Track (non RN accelerated track)**

**GEP Year One Pre-licensure** (must be taken as full-time student, no part-time option Year 1)

#### Fall Semester
- NG508 Pharmacology I 2 credits
- NG510 Concepts in Professional Nursing 2 credits
- NG511 Biomedical Sciences I 3 credits
- NG513 Health Assessment and Skills I 3 credits
- NG516A Nursing I: Care of Persons with Acute and Chronic Conditions 5 credits
- NG516B Nursing I: Clinical Care of Persons with Acute and Chronic Conditions 5 credits

#### Spring Semester
- NG509 Pharmacology II 1 credit
- NG512 Biomedical Sciences II 2 credits
- NG514 Health Assessment and Skills II 1 credit
- NG517A Nursing II: Care of Persons with Acute and Chronic Conditions 5 credits
- NG517B Nursing II: Clinical Care of Persons with Acute and Chronic Conditions 3 credits
- NG518A Nursing III: Care of the Childbearing and Child Rearing Family 5 credits
- NG518B Nursing III: Clinical Care of the Childbearing and Child Rearing Family 3 credits

#### Summer Semester
- NG519A Nursing IV: Clinical Capstone: Leadership and Management 3 credits
- NG519B Nursing IV: Clinical Capstone: Internship 7 credits

**Pre-licensure Credits (includes course 522 below)**
- 50 credits

Note: At completion of pre-licensure credits, GSN qualifying students will receive a Certificate of Completion and may sit for the National Certification Licensing Examination for Registered Nurses.

#### Full Time Cost*

- **In-state residents**
- **New England regional**
- **Out of state**

#### Year two

(Year 2 or 3 as denoted by footnotes)

**Fall Semester**
- NG522 Transition to the Professional Practice (continues into spring) (2) IP
- NG603A Societal Forces Influencing Graduate Nursing Education & Practice(2) 3 credits
- NG603B Interprofessional Community- Service Learning Practicum (continues into spring) (2) IP
- NG603C Interprofessional Population Health Clerkship (2) 1 credit
- NG604 Translating & Integrating Scholarship into Practice( 3) 3 credits
- NG613 Advanced Pathophysiology (2) 3 credits
- NG719 Genetics, Genomicsm Pharmacogenomics (3) 3 credits

**Spring Semester**
- NG522 Transition to the Professional Practice (continued from Fall) (2) 2 credits
- NG603B Interprofessional Community- Service Learning Practicum (continued from fall) (2) 1 credit

**Traditional BS to Master’s Track**

Traditional Master’s Track to Master’s degree is for registered nurses with a bachelor’s degree in nursing taking the master’s in nursing with a concentration in population health track or nurse educator track.

**Pre-master’s Option to Master’s degree** is for registered nurses with a bachelor’s degree in a field other than nursing or an associate’s degree in nursing (see Pre-master’s Option for additional details).

**Master’s In Nursing with Concentration in Population Health Track (RN with BSN)**

(Part time Option: Please Check with Program Director on alternative progression options)

Admission to the Traditional Master’s

Students who wish to be considered for admission to the Master of Science program must submit their application online via NursingCAS (Centralized Application Service). The link is on the Graduate School of Nursing Web site at www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the admissions office to schedule an interview. Applicants are reviewed individually on the basis of previous academic achievement, Graduate Record Examination (GRE) scores, professional experience and personal attributes.

Application

Applications to the Traditional Master’s into the Master of Science program will be considered when all of the following have been received:

- completed application form, including a clear personal statement of professional goals related to track of choice (see application for instructions);
- non-refundable application fee made payable to the University of Massachusetts;
- official transcripts of college graduation from an accredited institution and all other colleges and universities attended, including prerequisite courses if taken outside of a degree program;
- evidence of a bachelor’s degree from a program accredited by the National League for Nursing Accreditation Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE);
- Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing
- three letters of recommendation from people with whom the applicant has been in contact within the last five years:
  - at least one letter of reference must be from a professional nurse who has been recently responsible for evaluating the applicant’s professional nursing practice;
  - a second letter of reference must be an academic reference from a person with an advanced degree;
  - and the third letter should be a professional letter of reference related to academic, work or volunteer activities.
- current resume including work experience, education and professional activities.

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

Prerequisites for the Traditional Master’s Track

The applicant must have:

- an unrestricted Massachusetts license as a registered nurse;
- a bachelor’s degree in nursing earned from a program accredited by the NLNAC or CCNE;
- an undergraduate grade point average of 3.0 (B) or better;
- completed undergraduate courses in: professional nursing leadership, health assessment and concepts/practice in community health (with a grade of C or better);
- college level statistics course (with a grade of C or better);
- current CPR Certification for Health Providers (BLS) by the American Heart Association;
• computer competence at the user level, including file management and word processing; and
• proficiency in reading and writing in the English language. Applicants whose native language is not English must supply their Test of English as a Foreign Language (TOEFL) results.

Tuition and Fees, Financial Aid and Academic Policies and Procedures
See page 67.

The Pre-Graduate Option
The Pre-Graduate Option into the Master of Science program is designed for applicants who are registered nurses with an associate’s degree or diploma in nursing and a bachelor’s degree or higher degree in a field other than nursing. This track offers alternative means of qualifying for admission to the GSN at UMass Worcester, based on transfer of academic courses and course enrollment.

Although the Pre-Graduate Option does not grant a bachelor’s degree in nursing, it can enable students who are nurses with other degrees to meet the criteria for admission into the Master of Science program. The Pre-Graduate Option does not assign credit equivalencies to the prerequisite coursework because this track does not grant a bachelor’s degree in nursing. Instead, the Pre-Graduate Option grants exemptions for the specific Master of Science program admission requirement of a bachelor’s degree in nursing. Accepted students are required to take NG519A Nursing IV: Clinical Capstone: Leadership and Management and NG 603C IP Population Health Clerkship if they have not done so already. See the Master of Science in Nursing Program or Doctor of Nursing Practice Program for further information about the program’s curriculum, outcomes, tracks and specialties, course sequences, admissions and selected policies and procedures. See Course Descriptions for detailed information about GSN courses.

Admission to the Pre-Graduate Option
Students who wish to be considered for admission to the Pre-Graduate Option must submit their application online via NursingCAS (Centralized Application Service). The link is on the Graduate School of Nursing Web site at www.umassmed.edu/gsn. The GSN has rolling admissions: applications are considered as soon as they are complete. Qualified applicants will be contacted by the admissions office to schedule an interview. Applicants are reviewed individually on the basis of previous academic achievement, Graduate Record Examination (GRE) scores, professional experience and personal attributes.

Application
Applications to the Pre-Graduate Option into the Master of Science program will be considered when all of the following have been received:
• completed application form, including a clear personal statement of professional goals related to track of choice (see application form);
• non-refundable application fee made payable to the University of Massachusetts;
• official transcripts of college graduation from an accredited institution and all other colleges and universities attended, including prerequisite courses if taken outside of a degree program;
• evidence of an associate’s degree or diploma in nursing (NLNAC accredited) and a bachelor’s degree or higher degree in a field other than nursing from an accredited program;
• Acceptable results on the GRE revised General Test (Verbal Reasoning, Quantitative Reasoning, and Analytical Writing)
• three letters of recommendation from people with whom the applicant has been in contact within the last five years;
• at least one letter of reference must be from a professional nurse who has
been recently responsible for evaluating the applicant’s professional nursing practice;

- a second letter of reference must be an academic reference from a person with an advanced degree; and
- the third letter should be a professional letter of reference related to academic, work or volunteer activities; and current resume including work experience, education and professional activities.

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

**Prerequisites**
The applicant must have:

- an unrestricted Massachusetts license as a registered nurse with a degree earned from a program accredited by the National League for Nursing Accrediting Commission (NLNAC);
- an undergraduate grade point average of 3.0 (B) or better;
- completed undergraduate courses in health assessment and nursing leadership (or take prerequisite course NG519A)
- college level statistics course (with a grade of C or better)
- current CPR Certification for Health Providers (BLS) by the American Heart Association;
- computer competence at the user level, including file management and word processing; and
- proficiency in reading and writing in the English language. Applicants whose native language is not English

**Tuition and Fees, Financial Aid and Academic Policies and Procedures**
See page 67.

**Post-master’s Certificate Option**
The post-master’s certificate option is designed for individuals who have previously acquired their master’s degree in nursing from a program accredited by the National League for Nursing Accrediting Commission or the Collegiate Commission on Nursing Education.
The Post Master’s Certificate has two NP options:

1) Masters prepared certified nurse practitioners who seek additional preparation in the population focus of Adult-Gerontology Primary Care or Adult-Gerontology Acute Care,

2) Masters prepared nurses who seek initial certification in Adult-Gerontology Primary Care or Adult-Gerontology Acute Care.

A review of student’s transcripts and prior course/clinical work is done by the Track Coordinator to ensure that they are consistent with professional nursing standards and guidelines: this determines the appropriate plan of study. Determination of the required clinical hours and any additional course work needed is discussed with the student prior to matriculation.

The students in the Post Master’s Certificate Program are required to complete advanced pathophysiology, advanced pharmacotherapeutics, and advanced health assessment either prior to admission or before the track courses.

The post-master’s certificate option allows nurses with master’s degrees to expand their nursing competencies in the graduate nursing tracks in order to become Adult-Gerontology Acute Care Nurse Practitioners, Adult-Gerontology Primary Care Nurse Practitioners, and Nurse Educators.

**Nurse Educator**
The Nurse Educator track prepares nurses for
advanced practice roles in faculty or staff
development, providing an opportunity to acquire
teaching skills and strategies that address student,
program and patient outcomes as well as leadership
skills to improve health care. The plan of study
includes all nurse educator related courses in the
Master of Science curriculum (e.g., N620, 622,623)
along with required advanced practice master’s
core courses (e.g., N603A, N603B, N603C, N604,
N613, N614, N615A and N615B, N704).

**Nurse Practitioner and Nurse Educator Tracks**

**Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP) Certificate**

This post-master’s certificate option is a 19- to 29-
credit program designed to meet the needs of the
master’s-prepared nurse who desires formal
education and clinical training in adult-
gerontology primary care in order to become
eligible to sit for certification and advanced
practice licensure as an adult-gerontology
primary care nurse practitioner. The plan of study
includes all clinically related courses in the
existing AGPCNP curriculum (e.g., N630A and B,
N631A and N631B) along with required advanced
practice core courses (e.g., N613, N614, N615A and
N615B). Similar advanced practice core course
content may be demonstrated in the student’s
previous master’s program.

**Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) Certificate**

This post-master’s certificate option is a 19- to
29- credit program designed to meet the needs of
the master’s-prepared nurse who desires formal
education and clinical training in adult
gerontology acute care in order to become
eligible to sit for certification and advanced
practice licensure as an adult-gerontology acute
care nurse practitioner. The plan of study
includes all clinically related courses in the AG-
ACNP curriculum (e.g., N640A, N640B, N641A and
N641B) along with required advanced practice
core courses (e.g., N613, N614, N615A and
N615B). Similar advanced practice core course
content may be demonstrated in the student’s
previous master’s program.

**Nurse Educator Certificate**

This post-master’s certificate option is a 12- to 22-
credit program designed to meet the needs of a
master’s-prepared nurse who is interested in
formal instruction in the theoretical principles and
application of nursing education. The plan of
study includes course work in theoretical
principles and curricular issues (N620), evaluation
and outcomes (N623), leadership principles
(N624), advanced instructional methods (N622)
and a preceptored practicum focusing on the
academic nurse educator (N625B).

**Admission**

Students who wish to be considered for admission
to the post-master’s certificate option must submit
their application online via NursingCAS (Centralized
Application Service). The link is on the Graduate
School of Nursing Web site
www.umassmed.edu/gsn The GSN has rolling
admissions: applications are considered as soon as
they are complete. Qualified applicants will be
contacted by the admission office to schedule an
interview. Applicants are reviewed individually on
the basis of previous academic achievement,
professional experience and personal attributes.

**Application**

Applications to the Post-master’s Certificate
Option will be considered when all of the
following have been received:

- completed application form, including
  a clear personal statement of
  professional goals related to track of
  choice (see application form);
- non-refundable application fee made
  payable to the University of
  Massachusetts;
- official transcripts of college graduation
  from an accredited institution and all
other colleges and universities attended, including prerequisite courses if taken outside of a degree program;
- three letters of recommendation from people with whom the applicant has been in contact within the last five years:
- at least one letter of reference must be from a professional nurse who has been recently responsible for evaluating the applicant’s professional nursing practice;
- a second letter of reference must be an academic reference from a person with an advanced degree; and
- the third letter should be a professional letter of reference related to academic, work or volunteer activities; and
- current resume including work experience, education and professional activities

Qualified applicants will be admitted on a space-available basis. Applicants may have to submit course syllabi for transfer credits for evaluation upon request.

**Prerequisites**
- an unrestricted Massachusetts license as a registered nurse;
- a master’s degree in nursing from a program accredited by the National League for Nursing Accrediting Commission (NLNAC) or the Collegiate Commission on Nursing Education (CCNE). The applicant is not required to take or repeat the GRE examination;
- a post-graduate grade point average of 3.0 (B) or better;
- completed undergraduate courses in professional nursing leadership, health assessment and concepts/practice in community health;
- statistics (with a grade of C or better);

- demonstrated competency in advanced health assessment through successful completion of clinical performance examination or enrollment in health assessment class;
- provide transcript of advanced pathophysiology and advanced pharmacology courses taken or must take these courses within last 5 years;
- current CPR Certification for Health Providers (BLS) by the American Heart Association;
- computer competence at the user level, including file management and word processing; and
- proficiency in reading and writing in the English language. Applicants whose native language is not English must supply their Test of English as a Foreign Language (TOEFL) results.

**Tuition and Fees, Financial Aid and Academic Policies and Procedures**
See page 67.
Tuition and Fees

Tuition and fees for the 2014-2015 academic years are listed for the Master of Science, Graduate Entry Pathway, Pre-master’s Option, Post-master’s Certificate, Doctor of Nursing Practice, BSN to PhD Track and PhD in Nursing programs. Please note that these are estimates, and that tuition and fees may change at any time without prior notice.

The cost to individual GSN students can vary depending on their program of study, course selection and applicable fees. Individual’s tuition is based on their residency at the time of application— in state, out of state or New England Regional (NER). Costs also vary according to whether students purchase their health insurance through the school. Course cost also varies, for example, according to whether a course is categorized as a “state” course or a “continuing education” course. Course categorization is based on several factors, including the time of a course’s development and onset of the related program or track. For example, all GEP and DNP courses are “continuing education” courses, as are some electives. The estimated tuition and fees displayed here allow prospective students to anticipate their costs.

Financial Aid

See Financial Aid and www.umassmed.edu/financialaid.aspx for completed information.

Graduate School of Nursing
Course Descriptions

Graduate Entry Pathway Courses

**NG508 Pharmacology For Nursing I**
This is the first of two Pharmacology courses. The purpose of this course is to examine pharmacotherapeutic agents used in the treatment of illness and other conditions, and the promotion, maintenance and restoration of wellness in diverse individuals across the lifespan. Emphasis is on the principles of pharmacokinetics, pharmacodynamics and pharmacogenetics in the treatment of selected illnesses and conditions, including, but not limited to, cardiovascular, endocrine, respiratory, infectious, and renal conditions. The focus is on concepts of safe administration and monitoring the effects of pharmacotherapeutic agents. 2 credits. Corequisites: NG508, NG510, NG511, NG513, NG516A, and NG516B.

**NG509 Pharmacology for Nursing II**
This is the second of two Pharmacology courses. The purpose of this course is to continue examining pharmacotherapeutic agents used in the treatment of illness and other conditions, and the promotion, maintenance and restoration of wellness in diverse individuals across the lifespan. Emphasis is on the principles of pharmacokinetics, pharmacodynamics and pharmacogenetics in the treatment of selected illnesses and conditions including, but not limited to, hematopoietic, neurological, and oncologic conditions. The focus is on concepts of safe administration and monitoring the effects of pharmacotherapeutic agents. 1 credit. Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG512, NG514, NG517A, NG517B, NG518A, and NG518B.

**NG510 Concepts in Professional Nursing**
This course introduces students to the basic concepts that are the foundation of professional nursing practice. Course content includes role and practice issues in professional nursing and health care: the health care continuum; the bio-psychosocial model of health; health prevention and promotion; legal, regulatory and ethical issues; critical thinking and evidence-based practice; practice guidelines and informatics; principles of teaching/learning; theories of the nurse-patient relationship; and the role of the professional nurse. 2 credits. Corequisites: NG508, NG511, NG513, and NG516A and B.

**NG511 Biomedical Sciences I**
Biomedical Sciences I is the first of two courses providing a review of human biochemistry, pathophysiology and pharmacology essential for nursing practice. This course focuses on the changes that occur in the human body when normal structure and/or function are altered by common conditions arising from the natural aging process, injury and disability, and when pharmacological interventions are implemented. 3 credits. Corequisites: NG508, NG510, NG511, NG513, and NG516A and B.

**NG512 Biomedical Sciences II**
Biomedical Sciences II is the second of two courses providing a review of human biochemistry, pathophysiology, pharmacology and nutrition essential for nursing practice. This course focuses on the changes that occur in the human body when normal structure and/or function are altered by common conditions arising from the natural aging process, disease, injury and disability, and when pharmacological and nutritional interventions are implemented. 2 credits. Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG514, NG517A and B, and NG518A and B.

**NG513 Health Assessment and Skills I**
This laboratory course is the first of two that focus on the competencies of technical clinical skills and health assessment necessary to provide safe, quality, patient-centered professional nursing care. 3 credits. Corequisites: NG508, NG510, NG511, and NG516A and B.

**NG514 Health Assessment and Skills II**
This laboratory course is the second of two courses that focus on the competencies of technical clinical skills and health assessment necessary to provide safe, quality, patient-centered professional nursing
NG516A Nursing I: Care of Persons with Acute and Chronic Conditions
This is the classroom component of NG516B. This course introduces students to the values, knowledge and competencies that are the foundation of safe, skilled, professional and patient-centered nursing care for adults with acute and chronic medical-surgical conditions. The classroom component focuses on the expected presentation, process, and outcomes of selected health conditions in the adult population. 5 credits Corequisites: NG508, NG510, NG511, NG513 and NG516B.

NG516B Nursing I: Clinical Care of Persons with Acute and Chronic Conditions
This is the clinical component of NG516A. Students will use critical thinking and effective communication skills to deliver safe, competent, professional and patient-centered nursing care to adults with acute and chronic medical-surgical conditions. Working with clinical faculty and other nursing colleagues, students will assess client needs and develop, implement and evaluate a plan of nursing care to meet expected client-centered outcomes. 5 credits Corequisites: NG508, NG510, NG511, NG513 and NG516A.

NG517A Nursing II: Care of Persons with Acute and Chronic Conditions
This course continues the introduction of core concepts of acute and chronic conditions. Emphasis will be on providing nursing care to individuals and families experiencing selected acute and chronic psychiatric and medical-surgical conditions. The impact of acute and chronic illness on adult developmental stages and transitions will be examined. 5 credits. Prerequisites: Ng508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG509, NG512, NG517A and B, and NG518A and B.

NG517B Nursing II: Clinical Care of Persons with Acute and Chronic Conditions
This course is the clinical component of NG517A and continues the focus of NG516B on the provision of client-centered nursing care to individuals and families in hospital- and community-based settings who are experiencing selected acute and chronic psychiatric and medical-surgical conditions. 3 credits Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG509, NG514, NG517A, and NG518A.

NG518A Nursing III: Care of the Childbearing and Child Rearing Family
This course presents the values, knowledge and competencies that are the foundation of safe, skilled, professional and patient-centered nursing care of families experiencing normative childbearing and child rearing, and for children experiencing acute and chronic conditions. Emphasis is on all stages of pregnancy, and the experience of hospitalization and adaptation to chronic conditions for children. Life transitions related to childbearing and child rearing experiences will be analyzed. 5 credits Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG509, NG514, NG517A and B, and NG518B.

NG518B Nursing III: Clinical Care of the Childbearing and Child Rearing Family
This course is the clinical component of NG518A. In this course, students will use critical thinking to make evidence-based clinical judgments for, and develop effective communication skills with, families experiencing normative childbearing and child rearing, and with children experiencing acute and chronic conditions. Working with nursing colleagues and other members of the interdisciplinary team, students will prioritize and provide nursing care in hospital settings. 3 credits Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B. Corequisites: NG509, NG512, NG514, NG517A and B, NG518B.

NG519A Nursing IV: Clinical Capstone: Leadership and Management
This course focuses on the professional role of the nurse as a collaborator, leader and provider of care with nursing colleagues and other members of the interprofessional health care team, and within the context of complex health care systems. 3 credits
Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B, NG514, NG517A and B, NG518A and B. Corequisite: NG519B.

**NG519B Nursing IV: Clinical Capstone: Clinical Internship**
This clinical course focuses on the professional role of the nurse as a provider of care as part of the interprofessional health care team. Working one-on-one with a nurse preceptor approved by GSN nursing faculty, and with guidance from GSN nursing faculty, students integrate the values, knowledge and competencies of professional nursing into their practice as a manager and provider of safe, competent, patient-centered nursing care, and as a nursing colleague and member of an interprofessional health care team. 7 credits
Prerequisites: NG508, NG510, NG511, NG513, and NG516A and B, NG509, NG514, NG517A and B, NG518A and B. Corequisite: NG519A.

**NG522 Transition to Professional Practice**
This course is designed to coincide with students’ entry into their first practice role following licensure as a registered nurse. Students will evaluate their professional growth as clinicians and discuss issues related to professional and advanced practice nursing that arise in their practice and in the classroom. 2 credits
Prerequisites: Completion of GEP Year One. Corequisites: NG603A, NG603B, NG603C, and NG604, NG613, and NG615A.

**Master of Science Program Courses Core Courses**

**N/NG603A Societal Forces Influencing Graduate Nursing Education and Practice**
This course explores the dynamic issues and societal forces that require leadership for nursing practice. Included is the regulation of and the authority for graduate nursing practice (licensure, scope of practice, accreditation, certification, credentialing and education) coupled with the issues of advocacy, health disparities, health care economics and financing, health literacy, health policy, technological advancement, medical ethics, and the sociocultural factors influencing the health behaviors and health outcomes of the populations we serve. This course brings to life the Determinants of Health Framework to understand the factors impacting health and health outcomes. Using the Precede-Proceed and/or the Socio-Ecological Model, scientific evidence is researched and applied to reflect the modifiable determinants to improve the health of populations. 3 credits
Corequisite: N/NG603B

**N/NG603B Interprofessional and Population Health Community Service Learning Practicum and Seminar**
This two-semester course provides students with an opportunity to apply interprofessional teamwork skills coupled with knowledge and experience with graduate nursing role development to population health/community service learning experiences with a medically underserved, vulnerable and/or high-risk population/community. Goals and objectives from Healthy People 2020 will provide a basis for student assessment, intervention and evaluation of a specific health promotion or disease prevention strategy or program in the community. 1 credit
Corequisite: N/NG603A

**NG603C Interprofessional Population Health Clerkship: Caring for Populations within their Communities Practicum and Seminar**
This two-week population health immersion introduces small teams of medical and graduate nursing students to the application of public health concepts to populations/communities as a unit of care. Student groups will work with academic and community faculty of a variety of disciplines to assess populations and communities as units of care to identify available and needed resources for the population of focus and advocate for at-risk populations to improve health outcomes. 1 credit
Corequisite: N/NG603A

**N/NG604 Translating & Integrating Scholarship into Practice**
This is a core course that prepares students to critically examine and seek evidence for practice, ethically translate current evidence and identify gaps in clinical knowledge. This course provides the student with a foundation in nursing research, theory, research ethics, and evidence-based practice approaches. 3 credits
**N/NG704 Principles of Epidemiology**
This course will provide students with concrete skills to understand and critique the medical literature. Students will learn about the various types of epidemiology study designs including their potential strengths and limitations. Using these skills, students will critique articles from the medical literature. Students will also work in groups to develop an epidemiology study design to address a clinical hypothesis. 3 credits. Pre-Requisites or Co-requisite Course: Matriculated into UMass GSN or permission from the course director

**N/NG719 Genetics, Genomics and Pharmacogenomics**
This course provides an introduction to fundamentals of genetics, and genomics, including pharmacogenomics. Basic concepts and principles of genetics and genomics will be covered in these lectures, including course assignments involving quizzes and case studies. This course will also discuss integration of the basic concepts to enhance understanding, knowledge, application and utilization of these principles in clinical settings for education and practice. Perspectives on ethical, legal and socioeconomic issues for advanced practice nurses will also be addressed. Implications regarding personalized medicine and direct-to-consumer testing in regard to patient care and practice will be discussed. 3 credits

**Advanced Practice Core Courses**

**N/NG613 Advanced Pathophysiology**
The focus of this course is on the interrelation of human systems and the effect that illness in one body system has on the functions of the whole person. Concepts related to clinical physiology and research literature related to pathophysiology of various body systems are examined. Pertinent literature related to nursing interventions associated with improved physiological status is analyzed. 3 credits

**N/NG614 Advanced Pharmacotherapeutics**
This course is designed to meet the needs of the advanced practice nurse prescriber in the primary and acute care setting, building upon previous and/or concurrent acquired knowledge from nursing, pathophysiology and other sciences. The development of clinical decision-making skills essential to safe and effective pharmacologic intervention is the focal point of the course. 3 credits

**N/NG615A Advanced Health Assessment**
This course further develops and integrates the health assessment competencies of interviewing, performing and documenting comprehensive and episodic health histories and physical examinations. Students will identify common symptoms, identify risk factors, incorporate appropriate health promotion and disease prevention strategies, formulate differential diagnoses and begin treatment plans for common acute and chronic illnesses. Critical thinking and clinical decision making is presented within the context of case studies and the comprehensive analysis of patient data and plan formulation. This is the theoretical didactic portion of advanced health assessment and forms a foundation of advanced clinical practice. 3 credits Corequisite: N/NG615B.

**N/NG615B Advanced Health Assessment Practicum**
This practicum assesses the student's integration of techniques in physical examination through lab practice, performance exams and utilization of standardized patients. The integration of all didactic and performance components, including clinical decision-making skills, are demonstrated through successful role playing, case study analysis and an Objective Structured Clinical Exam (OSCE). 1 credit Corequisite: N/NG615A.

**Adult-Gerontology Primary Care Nurse Practitioner Courses**

**N/NG630A Advanced Nursing Science: Adult-Gerontology Primary Care Nurse Practitioner Theory I**
This course is the first of two advanced nursing science theoretical courses for the preparation of the adult-gerontology primary care nurse practitioner. The focus of this course is on the development and refinement of the critical thinking skills necessary to achieve the APN domain and core competencies of the advanced practice nurse. Grounded in theory and evidence-based research, this course enhances the student’s knowledge of health promotion and
disease prevention and management strategies needed to care for the adult-older adult patient and family experiencing acute, episodic and selected chronic health problems in the ambulatory and community settings. 6 credits Pre requisites: Graduate Core Courses, 603A, 603B, 603C, 604, 704, 719 Graduate Entry Pathway courses, Advanced Pathophysiology 613, Advanced Pharmacotherapeutics 614, Advanced Physical Assessment 615A and 615B or by permission of instructor Corequisite: N/NG630B.

**N/NG630B Advanced Nursing Science: Adult- Gerontology Primary Care Nurse Practitioner- Clinical Practicum I**
This course is the first of two advanced nursing science clinical courses for the preparation of the adult-gerontology primary care nurse practitioner. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse in ambulatory and community settings. The course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of adult-older adult patients with acute and chronic health problems. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional role interaction. 4 credits Corequisite: N/NG630A

**N/NG631A Advanced Nursing Science: Adult- Gerontology Primary Care Nurse Practitioner Theory II**
This course is the second of two advanced nursing science theoretical courses for the preparation of the adult-gerontology primary care nurse practitioner. The focus is on the refinement and synthesis of critical thinking skills necessary to achieve the APN domain and core competencies of the advanced practice nurse. Grounded in theory and evidence-based research, the course enhances the student’s knowledge of health promotion and disease prevention and management strategies needed to care for the patient and family experiencing acute and chronic health problems in hospital settings. 6 credits Prerequisites: N/NG630A and B. Corequisite: N/NG631B.

**N/NG631B Advanced Nursing Science: Adult- Gerontology Primary Care Nurse Practitioner Clinical Practicum II**
This course is the second of two advanced nursing science clinical courses for the preparation of the adult-gerontology primary care nurse practitioner. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse to provide best practices in ambulatory and community settings. Clinical activities assist students to translate and integrate theories, standards of practice and evidence-based research into the assessment and management of acute and chronic health problems for adult-older adult patients and families in ambulatory and community settings. The student implements activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional role interaction. 3 credits Prerequisites: N/NG630A and B. Corequisite: N/NG631A.

**Adult-Gerontology Acute Care Nurse Practitioner Courses**

**N/NG640A Advanced Nursing Science: Adult-Gerontology Acute Care Nurse Practitioner Theory I**
This course is the first of two advanced nursing science theoretical courses for the preparation of the adult-gerontology acute care nurse practitioner. The focus of this course is on the development and refinement of the critical thinking skills necessary to achieve the APN domain and core competencies of the advanced practice nurse. Grounded in theory and evidence-based research, the course enhances the student’s knowledge of health promotion and disease prevention and management strategies needed to care for the patient and family experiencing acute and chronic health problems in hospital settings. 6 credits Pre requisites: Graduate Core Courses, 603A, 603B, 603C, 604, 704, 719 Graduate Entry Pathway courses, Advanced Pathophysiology 613, Advanced Pharmacotherapeutics 614, Advanced Physical Assessment 615A and 615B or by permission of instructor Corequisite: N/NG640B.

**N/NG640B Advanced Nursing Science: Adult-Gerontology Acute Care Nurse Practitioner Practicum I**
This course is the first of two advanced nursing science clinical courses for the preparation of the adult-
gerontology acute care nurse practitioner. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse to provide best practices in hospital settings. Clinical activities assist students to translate and integrate theories, standards of practice and evidence-based research into the assessment and management of acute and chronic health problems for adult-older adult patients and families in hospital settings. The student implements activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional role interaction. 3 credits Prerequisites: N/NG640A and B. Corequisite: N/NG641A.

**Family Nurse Practitioner Courses**

*N/NG 659 Advanced Nursing Science: Maternal & Child Care for the FNP*

This course is the first of three advanced nursing science theoretical courses for the preparation of the family nurse practitioner. The focus of this course is on the development of critical thinking skills necessary to achieve direct care and core competencies of the family nurse practitioner. This course provides the foundation for the delivery of primary health care to maternal and child patient populations including infants, toddlers, school-age children, and pre-teens. Grounded in family nursing theory and evidence-based research, this course enhances the student’s knowledge of health promotion, disease prevention and management strategies needed to care for patients experiencing acute, episodic and selected chronic health problems in ambulatory and community settings. 4 credits. Prerequisites: Graduate Core Courses, 603A, 603B, 603C, 604, 704, 719 Graduate Entry Pathway courses, Advanced Pathophysiology 613, Advanced Pharmacotherapeutics 614, Advanced Physical Assessment 615A and 615B or by permission of instructor.

*N/NG660A Advanced Nursing Science: Family Nurse Practitioner Theory I*

This course is the second of three advanced nursing science theoretical courses for the preparation of the family primary care nurse practitioner. The focus of this course is on the development and refinement of the critical thinking skills necessary to achieve the direct care and core competencies of the advanced practice nurse. Grounded in theory and evidence-based research, this course enhances the student’s knowledge of health promotion and disease prevention and management strategies needed to care for patients and their families experiencing acute, episodic and selected chronic health problems in ambulatory and community settings. 6 credits. Corequisite: NG660B.
NG660B Advanced Nursing Science: Family Nurse Practitioner Clinical Practicum I
This course is the first of two advanced nursing science clinical courses for the preparation of the family nurse practitioner with the practice doctorate. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse with the Doctor of Nursing Practice (DNP) in ambulatory and community settings. The course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of patients with acute and chronic health problems across the life span. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional role interaction. 4 credits Corequisites: N/NG660A, N/NG 660B, Corequisite N/NG 661A B

Nurse Educator Courses (for Traditional Master’s, GEP, DNP and PhD students)

N/NG 620 Advanced Nursing Science: Teaching and Curriculum Development for Nurse Educators
This course presents theoretical and evidence-based teaching theories, technologies and skills. Emphasis is placed on contemporary approaches to educating nurses in various settings with different learners. Nurse educator roles, theories of learning, curriculum development and research in nursing education are covered. 3 credits

N/NG 621B Clinical Practicum for Nurse Educators (270 Practicum hours)
This practicum offers the student the opportunity to enhance and refine their clinical appraisal, diagnostic reasoning and therapeutic intervention skills in the clinical area. Special emphasis is placed on the role of nurse educator in the clinical environment. Leadership and educational strategies to promote quality and safety in the clinical environment will be emphasized. 3 credits Prerequisites: N/NG620, Master of Science Year One courses.

NG661B Advanced Nursing Science: Family Nurse Practitioner Clinical Practicum II
This course is the second of two advanced nursing science clinical courses for the preparation of the family nurse practitioner. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse to provide best practices in ambulatory and community settings of children and adults. Clinical activities assist students to translate and integrate theories, standards of practice and evidence-based research into his/her assessment and management of acute and chronic health problems for patients and families in ambulatory and community settings. The student implements activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional role interaction. 4 credits Prerequisites: N/NG660A, N/NG 660B, Corequisite N/NG 661A B

NG661A Advanced Nursing Science: Family Nurse Practitioner Theory II
This course is the third of three advanced nursing science theoretical courses for the preparation of the family nurse practitioner. The focus is on the refinement and synthesis of critical thinking skills used by the advanced practice nurse to provide advanced practice nursing direct care and core competencies. Grounded in theory and evidence-based practice, the course enhances the student’s knowledge and ability to analyze and manage the comprehensive care of patients of all ages and the family in ambulatory community settings, and the professional and environmental issues influencing the health and care of the patient and the role of the advanced practice nurse. 6 credits Corequisite: N/NG661B Prerequisites: N/NG660A and B.

NG622 Advanced Nursing Science: Advanced Instructional Methods for Nurse Educators
This course provides the student with an opportunity to analyze and apply a variety of classroom and clinical strategies. Emphasis is placed on contemporary student centered approaches including problem-based learning, reflection, distance learning and appropriate integration of technology within the curriculum. 3 credits Prerequisites for Master of Science students: N/NG620, or taken concurrently with N/NG620 or with permission of course faculty. No prerequisites for PhD students.
**N623 Advanced Nursing Science: Identifying and Measuring Outcomes for Nurse Educators**
The emphasis of this course is on identifying, measuring and achieving outcomes. Content builds upon Year One student and patient outcome evaluation content. Program outcome evaluation, test development and clinical evaluation strategies are included. Processes designed to promote performance improvement in health care and to enhance the graduate’s ability to function effectively in a health care organization are discussed. 3 credits  
Prerequisites: N/NG620, or permission of course faculty.

**N624 Advanced Nursing Science: Systems Leadership for Nurse Educators**
This course examines organizational processes and structures designed to promote positive patient and educational outcomes. Grounded in theory and research, this course gives the student the opportunity to acquire knowledge and critical thinking skills necessary to serve in a leadership role in an educational institution or a health care organization. 3 credits  
Prerequisite: N/NG620

**N625B Advanced Nursing Science: Academic Teaching Practicum for Nurse Educators (270 Practicum hours)**
This practicum offers the student the opportunity to enact the role of the academic nurse educator and begin to synthesize leadership concepts into the academic environment. The prerequisite courses provide a theoretical foundation for the application and synthesis activities that characterize clinical learning and leadership in a practice profession. Philosophical and experiential issues specific to clinical and classroom instruction and leadership in nursing education are emphasized in seminar discussions. 3 credits  
Prerequisites for traditional Master of Science students: N/NG620, N/NG621B, N/NG622, N/NG623 and N/NG624.

**Elective Courses**

**N/NG590 Human Physiology**
This is a review course on basic principles of physiology that cover the functions of the human body with emphasis on the nervous, endocrine, muscular, cardiovascular, respiratory, digestive, renal and reproductive systems. The course will provide a broad view of the current knowledge on how the human body works and is intended for students in the fields of nursing and other allied health fields. 3 credits

**N/NG 643 Advanced Practice Critical Care Nursing I**
The focus of this course is to prepare the Adult-Gerontology Acute Care Nurse Practitioner student to provide care for critically ill patients. The focus of this course is on the development and refinement of advanced critical thinking skills necessary to master advanced concepts in critical care. Grounded in theory and evidence-based practice, the course enhances the student’s knowledge of diagnostic and collaborative management strategies needed to provide high quality care for adult/older adult patients with common life threatening illnesses and injuries and their families. 3 credits. Pre-requisites: Critical Care Nursing experience and Permission of instructor.

**N/NG 643B Advanced Practice Critical Care Nursing Practicum**
This course is the clinical practicum of the critical care subtrack to prepare nurse practitioner students to specialize in the care of critically ill patients. The focus is on refining assessment, diagnosis and treatment plans needed by the advanced practice nurse to provide care to critically ill adult patients. The student will integrate evidence-based practice into holistic care plans, developed within the interprofessional team, to provide direct care to critically ill adults/older adults and their families under the guidance of a qualified preceptor. 1 credit.

**N/NG 644 Advanced Practice Critical Care Nursing II**
This course focuses on the development and refinement of advanced critical thinking skills, and development of plans of care necessary to address the needs of special populations of critically ill adults-older adults**. Grounded in theory and evidence-based practice, the course enhances the student’s mastery of advanced concepts, knowledge of the diagnostics and collaborative management strategies needed to provide high quality care for patients experiencing specific critical illnesses and life threatening injuries,
and their families. **Special populations include, but are not limited to patients experiencing: Cardiogenic shock, cardiac surgery, neuro-critical care issues, critical care pregnancy conditions, burns, exposure to toxins & poisons, and immune-compromised patients, etc. 3 credits Pre-requisites: Critical Care Nursing experience and Permission of instructor.

N/NG 652 Military and Veterans' Healthcare
This course will provide the student with an understanding of the experiences, beliefs and health practices within the military culture. Health care concerns related to deployment, re-integration, family and veterans services will be discussed. Strategies to improve the health of military members and veterans in civil society will be presented. 3 credits

N/NG 681 Advanced Practice Cardiovascular Nursing I
This course explores the theories of health promotion and disease management pertinent to cardiovascular nursing. It is intended to prepare advanced practice nurses to provide care to cardiovascular patients across health care settings. Health promotion strategies for high-risk cardiovascular patients are explored. Predisposing risk factors along with current treatment modalities for cardiovascular disease are discussed. 3 credits

N/NG 682 Advanced Practice Cardiovascular Nursing II
The focus of this course is on the development and refinement of the clinical appraisal needed by the advanced practice nurse to effectively provide education and to manage adults with cardiovascular diseases. Risk factor identification and health promotion strategies incorporating the patient’s physiological and psychological responses to cardiovascular health problems and treatments are analyzed through clinical examples. Evidence-based research and the standards of care are synthesized to promote continuity of care throughout the cardiovascular patient’s trajectory of illness. 3 credits Prerequisites: N/NG 681 or permission of instructor.

N/NG 682 B Advanced Practice Cardiovascular Nursing Practicum
This course is the clinical practicum of the cardiac subtrack to prepare nurse practitioner students to specialize in care of adults/older adults with cardiac conditions. The focus is on refining assessment, diagnosis and treatment plans by the advanced practice nurse to provide comprehensive care to adult patients with acute and chronic cardiovascular disease. The student will integrate evidence-based practice into holistic care plans, developed within the interprofessional team, to provide direct care to critically ill adults/older adults and their families under the guidance of a qualified preceptor. 1 credit

N/NG 685 Living with Chronic Conditions and Terminal Illness
This course will explore the physical, psychological, social, ethical, spiritual and existential issues raised by the prospect of long-term, disabling, life-shortening conditions and illnesses as well as death and bereavement. It will prepare the participants with the necessary understanding and skills to develop supportive advanced practice nursing care for pediatric, adult and geriatric populations across settings. 3 credits

N/NG 686 Advanced Practice Oncology Nursing
This course will focus on cancer care knowledge, decision making and practices for advanced practice nurses caring for cancer patients in ambulatory, hospital and community settings. The course will examine cancer epidemiology, prevention, detection, treatment and professional practice. 3 credits

N/NG 686 B Advanced Practice Nursing in Oncology Practicum
This course is the clinical component for the preparation of the advanced practice oncology nurse practitioner. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed for advanced practice nurses caring for patients with cancer in a variety of healthcare settings. Cancer detection, treatment, and survivorship in acute and chronic care will be emphasized. During a 90 hour practicum, the student will implement the role activities of the advanced practice oncology nurse demonstrating critical thinking, carrying out therapeutic interventions, clear communication and professional role interaction. 1 credit

N/NG 691 Contemporary Issues in Women’s Health
This elective graduate nursing course provides the advanced practice nursing student with a theoretical foundation to provide evidence-based care to women
and will focus on a variety of issues specific to their health care. Specific concerns of women across the lifespan and the effects of culture and environment on women’s health are analyzed. Gender-based health issues and disparities and the role of the advanced practice nurse in dealing with these issues are examined. 3 credits

N/NG699 Independent/Directed Study
This course is open to all graduate students. Plans for study must be submitted in advance of registration on a form obtained from the Graduate School of Nursing. The student must meet with a faculty member to establish goals and objectives outlining the independent/directed study; the number of credits given for the study will then be determined. The student may take more than one independent study course, but no more than nine credit hours may be applied toward the degree. 1-3 credits Prerequisite: Permission of instructor and contractual agreement of course objectives and outcomes.

N/NG724A Advanced Practice Nursing in Emergency Care I (Course ON HOLD)
This theory course explores the knowledge needed for the Advanced Practice Nurse to work in urgent care settings. The course prepares students to apply knowledge from the biological, physiological, psychological, social and nursing sciences to care for patients with acute illnesses and injuries in an urgent care or observation setting. The course also reviews comprehensive care and evidence based practice for a variety of urgent illnesses and injuries requiring immediate and specialized care. Students will interpret assessment findings and diagnostic test results, and apply clinical practice guidelines. Health promotion and prevention strategies for high risk and/or medically under-served patients are applied within the context of culture, family and community. Students will develop skills needed to manage common injuries seen in urgent care settings. 3 credits. Pre-requisite 615A, 615B. co-requisite: N/NG724B or permission of instructor

N/NG724B Advanced Practice Nursing in Emergency Care Practicum I (Course ON HOLD)
This course is the clinical practicum to prepare the advanced practice nurse to care for patients with urgent health needs and acute exacerbations of chronic health problems. The focus of this course is on the development and refinement of clinical assessment and diagnostic skills needed by the advanced practice nurse caring for acute illnesses and injuries in an urgent care setting. This course builds on the student’s health assessment skills, and further develops the student’s ability to diagnose and manage care of clients with acute health problems. Students will develop management plans congruent with evidence based practice. Students will also have the opportunity to build skills in suturing and other minimally invasive procedures performed in urgent care settings. 1 credit Prequisites: 615B, 615B. Corequisites: NNG724A or permission of instructor.

N/NG725A Advanced Practice Nursing in Emergency Care II (Course ON HOLD)
This course focuses on the critically ill, unstable patient with emergent and life-threatening conditions in the emergency department. Comprehensive emergency services to manage complex emergent illnesses/injuries or that require immediate and/or specialized care performed in emergency rooms will be reviewed. In addition, a focus on global public health issues such as toxicologic illness, mass casualty management, disaster planning and pandemic care will be explored. 3 credits. Pre-Requisite: current BLS & ACLS certification, 724 A & 724B, permission of instructor. Co-requisite 725B.

N/NG725B Advanced Practice Nursing in Emergency Care Practicum II (Course ON HOLD)
This course is the second clinical practicum to prepare the advance practice nurse to care for patients with life threatening illnesses/injuries in an emergency department. The focus of this course is on the refinement of clinical appraisal and diagnostic skills needed by the advanced practice nurse in the emergency department caring for critically ill or seriously injured patients. This course enhances the student’s ability to apply evidence based practice to the care of clients with emergent acute health
problems. The student practices in the role of the advanced practice nurse demonstrating critical thinking, therapeutic interventions, communication and professional role interactions within an interprofessional team. 1 credit. Co-requisite N/NG 725A or permission of instructor.

**Doctor of Nursing Practice Courses**

**N704 Principles of Epidemiology**

This course will provide students with concrete skills to understand and critique the medical literature. Students will learn about the various types of epidemiology study designs including their potential strengths and limitations. Using these skills, students will critique articles from the medical literature. Students will also work in groups to develop an epidemiology study design to address a clinical hypothesis. 3 Credits. Pre-Requisites or Co-requisite Course: Matriculated into UMass GSN or permission from the course director.

**N705 Trends Influencing the Doctor of Nursing Practice**

This course explores the trends influencing the role of the DNP in hospitals and community-based settings. The student will develop strategies to address these challenges that are grounded in evidence-based practice. The course enables graduates to serve as leaders in synthesizing clinical nursing knowledge and translating research findings into practice within complex health care settings and community-based organizations. 3 credits. Prerequisite: Matriculated student or permission of instructor.

**N706 Health Policy for Health Care Professionals**

This course enhances students’ understanding of health policy and analysis of health care issues within the context of advanced nursing and interprofessional practice. This knowledge is critical for leaders in nursing and other disciplines so they can contribute to the development and evaluation of health policies. The course will examine and critically analyze the health care system in the U.S. It will emphasize the major issues and trends which are the subject of intense public concern and government interest. Students will analyze health policy frameworks and apply them to professional, economic, political and social health care issues. This course will enable graduates to serve as leaders in analyzing the impact of health policies on patients, populations and health care systems. 3 credits Pre-Requisite: Matriculated student or Permission of instructor.

**N707 Biomedical Informatics**

This course offers an overview of the field of biomedical informatics. Concepts from computer and information science are combined with current issues in research, clinical practice, and the use of information systems/technology in health systems and patient care. The course will provide a broad overview of bioinformatics, standards and the use of technology for electronic health records, decision support systems, security including confidentiality, information retrieval, and public health informatics for patient care and consumer health informatics. 3 credits. Pre-requisite Matriculated student or permission of instructor.

**N708 Organizational Systems and Health Care Financing**

This course expands the student’s understanding of systems theory and health care economics. The student will explore current global, technological, socioeconomic and organizational factors that have an impact on the delivery of high quality health care. The course expands upon expert clinical knowledge and enables students to engage with other interprofessional team members in developing and evaluating contemporary approaches to clinical practice within health care organizations. 4 credits.

**N709 DNP Capstone Project Prospectus**

This course requires the refinement of the scholarly capstone prospectus for the preparation of advanced practice nurse with the practice doctorate. The focus of this course is on the integration of research findings in developing an advanced practice nursing activity to improve patient focused organizational outcomes. This course will also integrate information from the DNP core and elective courses to formulate a prospectus that demonstrates the translation of research to evidence-based practice. 2 Credits. Pre-Requisites or Co-requisite course: N704 N705 N706 N707 N708 N710 N815.
N 710 Clinical Scholarship & Analytic Methods
This course expands the students’ understanding of clinical scholarship, analytic methods, evidence based models and performance science within the context of advanced nursing practice. This course will enable graduates to serve as leaders in synthesizing clinical nursing knowledge and translation of research findings into practice in complex health settings and community-based organizations. Through the application of new knowledge and use of performance science methods, students will be able to evaluate outcomes of practice, reduce variation in care across settings and improving health outcomes. 3 credits. Pre requisites or Co-requisite course: N704 N705 N706 N707 N710 N815

N723 Quality and Patient Safety in Health Care Organizations
This course prepares the advanced practice nurse with the DNP with the knowledge, theory and organizational science concepts necessary to design and evaluate performance improvement in health care organizations related to quality and safety. 3 credits

N770 Doctor of Nursing Practice Residency I
This course is the first of two advanced nursing science residency courses for the preparation of advanced practice nurses with the practice doctorate. The focus is on development and refinement of the leadership skills needed by the advanced practice nurse. The course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of the increasingly complex patients to improve practice and health care delivery. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional interaction. 3 credits Prerequisites: Completion of DNP Year One courses and concurrent enrollment in N722.

N771 Doctor of Nursing Practice Residency II
This course is the second of two advanced nursing science residency courses for the preparation of advanced practice nurses with the practice doctorate. The focus is on the refinement and synthesis of the leadership skills needed by these advanced practice nurses. This course enhances the student’s ability to translate evidence-based research and clinical scholarship to decrease risk and improve health care outcomes for patients. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication and professional interaction. 3 credits Prerequisites: Completion of DNP Year One courses, N770 and concurrent enrollment in N772.

N772 Doctor of Nursing Practice Capstone Project I
This course requires the development of a scholarly capstone project for the preparation of advanced practice nurses with the practice doctorate. The focus is on the identification and implementation of a specific activity that uses evidence to improve patient-focused organizational outcomes. The scholarly capstone project integrates knowledge from the DNP core and track courses, electives and clinical residency experience in the formulation of a capstone project that demonstrates advanced practice nursing leadership at the practice doctorate level. 2 credits Prerequisites: Completion of DNP Year One courses and concurrent enrollment in N770.

N773 Doctor of Nursing Practice Capstone Project II
This course requires the completion of a scholarly capstone project for the preparation of advanced practice nurses with the practice doctorate. The focus is on the completion of a specific activity that uses evidence to improve patient-focused organizational outcomes. This scholarly capstone project is derived from the DNP track courses and electives including clinical residency experiences. The scholarly capstone project demonstrates the student’s attainment of the program outcomes and provides evidence of the student’s knowledge and expertise as an advanced practice nurse at the practice doctorate level. 2 credits Prerequisites: Completion of DNP Year One courses, N772 and concurrent enrollment in N771.

N774 DNP APN Residency I
Doctor of Nursing Practice Advanced Practice Nursing Residency I
This course is the first of two advanced nursing science residency courses for the preparation of advanced practice nurse with the practice doctorate.
The focus of this course is on development and refinement of the leadership skills needed by the nurse practitioner with the Doctor of Nursing Practice (DNP). This course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of the increasingly complex patients to improve practice and health care delivery across settings. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication, and professional interaction. Prerequisites: Matriculated student in the Graduate School of Nursing Completion of the graduate core, advanced practice core, FNP specialty courses, and N 709 DNP Capstone Project Prospectus

Co-requisites: N 772 DNP Capstone Project I
4 credit hours

**N775 DNP APN Residency II**

**Doctor of Nursing Practice Advanced Practice Nursing Residency**

This course is the second of two advanced nursing science residency courses for the preparation of the advanced practice nurse with the practice doctorate. The focus of this course is on the refinement and synthesis of the leadership skills needed by these advanced practice nurses with the Doctor of Nursing Practice (DNP). This course enhances the students’ ability to translate evidence-based research and clinical scholarship to decrease risk and improve health care outcomes for patients. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic intervention, communication, and professional interaction. Prerequisites: Matriculated student in the Graduate School of Nursing Completion of the graduate core, advanced practice core, FNP specialty courses, N 709 DNP Capstone Project Prospectus, and N 772 DNP Capstone Project I, and N DNP Advanced practice Nursing Residency I

Co-requisites: N 773 DNP Capstone Project II
4 credit hours

**N795 Independent/Directed Study**

This course is open to DNP students. The goal of independent study is to complement the DNP student’s program in a way that helps him/her develop additional knowledge and skills as an advanced practice nurse with a practice doctorate.

Plans for study must be submitted in advance of registration on the Independent Study Advance Registration form obtained from the Graduate School of Nursing. The student must meet with the faculty member of record to establish written goals, objectives and evaluation criteria for the independent study. Upon establishing the goals and objectives, the number of credits will be determined by the faculty member in consultation with the DNP program director. The student may take more than one independent study, but no more than six credit hours may be applied toward the DNP degree. 1 to 6 credits, by arrangement with the faculty.

**N815 Statistical Analysis of Data**

This course provides the student with an introduction to inferential statistics. Emphasis is placed on practical application, rather than mathematical theory. Topics discussed include t-tests, analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA and mixed ANOVA, multivariate analysis of variance (MANOVA), correlations and scatter plots and regression analyses. 3 credits

**DNP Family Nurse Practitioner Courses**

**NG760A Advanced Nursing Science for the DNP: Family NP Theory I**

This course is the first of two advanced nursing science theoretical courses for the preparation of the family nurse practitioner with the practice doctorate. The focus of this course is on the development and refinement of the critical thinking skills necessary to achieve the domain, core competencies and essentials of the advanced practice nurse with the Doctor of Nursing Practice (DNP). Grounded in theory and evidence-based research, the course enhances the student’s knowledge of health promotion and disease prevention and management strategies needed to care for the patient and family experiencing acute and chronic health problems in ambulatory and community settings. 8 credits

Prerequisites: Graduate Core Courses, Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment. Corequisite: NG760B.
NG 760B Advanced Nursing Science for the DNP: Family Nurse Practitioner Clinical Practicum I
This course is the second of three advanced nursing science clinical courses for the preparation of the family nurse practitioner with the practice doctorate. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse with the Doctor of Nursing Practice (DNP) in ambulatory and community settings. The course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of patients with acute and chronic health problems. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic interventions, communication and professional role interaction. 4 credits Prerequisites: Graduate Core Courses, Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment. Corequisite: NG760B.

NG761A Advanced Nursing Science for the DNP: Family NP Theory II
This course is the second of two advanced nursing science theoretical courses for the preparation of the family nurse practitioner with the practice doctorate. The focus of this course is on the development and refinement of the critical thinking skills necessary to achieve the domain, core competencies, and essentials of the advanced practice nurse with the Doctorate of Nursing Practice (DNP). Grounded in theory and evidence-based research, the course enhances the student’s knowledge of health promotion and disease prevention and management strategies needed to care for the patient and family experiencing acute and chronic health problems in ambulatory and community settings. 8 credits Prerequisites: Graduate Core Courses, Advanced Pathophysiology, Advanced Pharmacology, Advanced Health Assessment, and NG760A, NG 760B. Corequisite: NG761A.

NG761B Advanced Nursing Science for the DNP: Family Nurse Practitioner Clinical Practicum II
This course is the second of two advanced nursing science clinical courses for the preparation of the family nurse practitioner with the practice doctorate. The focus is on the development and refinement of the clinical appraisal and diagnostic skills needed by the advanced practice nurse with the Doctor of Nursing Practice (DNP) in ambulatory and community settings. The course enhances the student’s ability to apply theories, standards of practice and evidence-based research to the care of patients with acute and chronic health problems. The student implements the role activities of the advanced practice nurse through critical thinking, therapeutic interventions, communication and professional role interaction. 3 credits Prerequisites NG760, NG760 B. Corequisite: NG761A.

PhD Courses
N706 Health Policy for Health Care Professionals
This course enhances students’ understanding of health policy and analysis of health care issues within the context of advanced nursing and interprofessional practice. This knowledge is critical for leaders in nursing and other disciplines so they can contribute to the development and evaluation of health policies. The course will examine and critically analyze the health care system in the U.S. It will emphasize the major issues and trends which are the subject of intense public concern and government interest. Students will analyze health policy frameworks and apply them to professional, economic, political and social health care issues. This course will enable graduates to serve as leaders in analyzing the impact of health policies on patients, populations and health care systems. 3 credits Pre-requisite: Matriculated student or Permission of instructor

N707 Biomedical Informatics
This course offers an overview of the field of biomedical informatics. Concepts from computer and information science are combined with current issues in research, clinical practice, and the use of information systems/technology in health systems and patient care. The course will provide a broad overview of bioinformatics, standards and the use of technology for electronic health records, decision support systems, security including confidentiality, information
retrieval, and public health informatics for patient care and consumer health informatics. 3 credits. Prerequisite: Matriculated student or permission of instructor.

N800 History and Philosophy of Nursing Science
This course is designed to prepare students to systematically analyze epistemological, ontological and metatheoretical perspectives in the philosophy of science, while also considering the implications for scientific inquiry, theory development and knowledge development in nursing. 3 credits. Prerequisites: PhD program matriculation or permission of instructor.

N801 Qualitative Research Methods
The focus of this course is on the use of qualitative research methods to build substantive knowledge in nursing. Issues in qualitative research are identified and discussed, and critical analysis of traditional and emerging designs debated. Selected qualitative research designs are presented and the philosophical underpinnings and specific data collection and analysis methods associated with each design are identified, discussed, compared, contrasted and analyzed. Research from nursing and other fields is critiqued. Experiential learning methods and techniques include design, preparation and presentation of a research project. 3 credits. Prerequisites: PhD program matriculation or permission of instructor.

N802 Quantitative Research Methods
This course provides students with an advanced study of research designs and methods used in quantitative nursing research. Analyses of quantitative methods that are currently used in biomedical, behavioral, social and nursing sciences are explored. 3 credits. Prerequisites: N800 and N801, or permission of instructor.

N803 Theory
This course focuses on the critical analysis of theories, concepts, frameworks, and models for research. Emphasis is on analysis, including application of criteria for evaluating concepts in research and theory development. 3 credits. Prerequisites: N800 and N801, or permission of faculty of record.

N804 Measurement and Instrumentation in Clinical Research
This is an advanced, graduate-level course that focuses on measurement theory and the processes of instrument evaluation, refinement and development. This course explores the use of quantitative and qualitative procedures to measure clinically important variables. In addition, emphasis is posited upon the interaction of conceptual, methodological, cultural and pragmatic considerations that are essential to understand when measuring variables among clinical populations. 3 credits. Prerequisites: N801 and N802, or permission of instructor.

N809 Dissertation Seminar
The purpose of the dissertation seminar is to assist students who have completed their course work and passed the comprehensive examination to sustain momentum in the completion of their dissertation proposal. The seminar provides regular, organized opportunities for students to present dissertation proposal work in progress to peers and faculty mentors. This seminar is designed to augment (not replace) the one-to-one advising that each student receives from his/her dissertation advisor. Dissertation seminar is designed to run concurrently with N899 dissertation advisement. A minimum of two semesters of dissertation seminar is required. Participation beyond two semesters is required for all students until proposal completion. 0 credits. Prerequisite: Must pass the comprehensive examination.

N810 Doctoral Practicum
This is an advanced graduate-level course which provides students with a mentored practicum experience in at least one of five key areas: research, leadership, education, scientific integrity, scholarship and team science. The practicum experience is highly individualized and designed to develop expertise in a selected area of PhD scholarship. 1 credit.

N812 Health Literacy in Research and Practice
This course focuses on examining and analyzing the concept of health literacy, with an emphasis on the relationship of health literacy to one’s ability to
manage and optimize their health. The association of health literacy to health disparities and health outcomes will be explored. Challenges in conducting health literacy research and challenges inherent in providing quality care to those with limited health literacy will be examined. Evidence based individual and organizational approaches to mitigate the effects of limited health literacy will be addressed. 3 credits Open to all graduate students.

N813 PhD Grant & Proposal Writing
This course emphasizes a synthesis of the course content in the PhD program through development of a formal grant proposal. It explores the elements of grant writing, proposal development and ethical considerations related to human subjects’ research. Students will be guided in the development of an individual grant proposal eligible for submission to a funding sponsor. 2 credits

N814 Genomics for Clinical Practice & Research
This course provides the foundation to use genetics and genomic concepts in advanced practice and clinical research. The principles of human and molecular genetics including variations, patterns of inheritance and multifactorial inheritance will be discussed. Gene action and expression, cytogenetics, the Human Genome Project, genetics terminology and basic principles of laboratory methods used in genetics and genomics will be examined. The evolving principles of epigenetics, nutrigenomics, and pharmacogenomics in patient care and research will be explored with attention given to the associated ethical, legal and social implications. Inherited and acquired health conditions will be used to illustrate the impact of genetics and genomics on nursing practice and on opportunities for research. 3 credits

N815 Statistical Analysis of Data
This course provides the student with an introduction to inferential statistics. Emphasis is placed on practical application, rather than mathematical theory. Topics include t-tests, analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA and mixed ANOVA, multivariate analysis of variance (MANOVA), correlations and scatter plots and regression analyses. 3 credits

N816 Scholarly Writing in Nursing and Interprofessional Journals Course
This course prepares the student for the writing, editing, and reviewing skills required for scholarly writing. The student will prepare and submit a scholarly manuscript to a peer-reviewed nursing or interprofessional journal. N816 discusses the key elements of scholarly writing including development a query letter, preparation of a scholarly paper, determination of authorship, and identification of ethical considerations. Strategies of reading critically, synthesis of the literature, use of appropriate vocabulary, and revising the manuscript will be discussed. Each student will engage in peer review of writing summaries and manuscripts. Credit: 1 Pre requisites: Graduate of a PhD or DNP Program or permission of instructor.

N820 Essentials for Academic Health Educators
This course presents evidence based teaching theories, strategies and skills for individuals interested in the role of faculty in programs preparing students for health professions. Contemporary issues and approaches to educating students with diverse learning needs will be addressed from assessment of learning styles to evaluation of outcomes. Societal influences on the curriculum development process are highlighted along with strategies for enhancing academic career development. 3 cr. Pre Reqs: None

N890 Advanced Statistics
This course builds on N815 Statistical Analysis of Data to provide in-depth instruction on practical applications of multivariate data analysis, focusing on statistical issues and techniques that students are likely to encounter in their research. Topics include pre-analysis data screening, assessment of model fit for analysis of variance and covariance (ANOVA/ANCOVA) and linear regression, model selection techniques, repeated measures ANOVA, multivariate analysis of variance (MANOVA) and logistic regression. 3 credits Prerequisites: N815 or permission of instructor.

N895 Independent/Directed Study
This course is open to PhD students. The goal of independent study is to complement the PhD student’s program in a way that helps him/her develop additional knowledge and skills that could not be reasonably gained with a traditional course offering. Plans for study must be submitted in advance of registration on the Independent Study
Advance Registration form obtained from the Graduate School of Nursing. The student must meet with the faculty member of record to establish written goals, objectives and evaluation criteria for the independent study. Upon establishing the goals and objectives, the number of credits will be determined by the faculty member in consultation with the PhD program director. The student may take more than one independent study, but no more than nine credit hours may be applied toward the PhD degree. 1 to 3 credits Prerequisite: Agreement with course faculty.

N899 Dissertation Credits
Students are required to take a minimum of 18 dissertation credits. Most students elect to take three to six credits per semester for one to two years until completion of the dissertation. This component of the PhD program requires students to work independently on a research study in close collaboration with their dissertation advisor and committee members. N809 Dissertation Seminar is taken concurrently with dissertation credits until the oral defense of the dissertation proposal is completed. Prerequisites: completion of all required and elective PhD coursework, and passing the comprehensive examination.
ADMINISTRATION AND FACULTY

University of Massachusetts Trustees

Henry M. Thomas III, JD, of Springfield, Chair Ruben J. King-Shaw Jr. of Carlisle, Vice Chair Maria D. Furman of Wellesley
James R. Buonomo, of Shrewsbury
Richard P. Campbell, JD, of Cohasset
Lawrence M. Carpman of Marshfield
Edward W. Collins Jr. of Springfield
David G. Fubini of Brookline
Geoffroy of Chelmsford, Student Trustee
Zoila M. Gomez, JD, of Lawrence
Philip W. Johnston of Marshfield
Megan Kingston of Tiverton, RI, Student Trustee
Alyce J. Lee of Milton
Patrick Lowe of Worcester, Student Trustee
Matthew H. Malone, PhD, of Roslindale
Jeffrey B. Mullan, JD, of Milton
Colin Murphy of Monson, Student Trustee
Nolan O’Brien of Quincy, Student Trustee
Kerri Osterhaus-Houle, MD, of Hudson
R. Norman Peters, JD, of Paxton
Victor Woolridge of Springfield
Margaret D. Xifaras, JD, of Marion

University Administration

Robert L. Caret, PhD (University of New Hampshire), President
James R. Julian Jr., JD (New England School of Law), Executive Vice President and Chief Operating Officer Kumble R. Subbaswamy, PhD (Indiana University Bloomington), Chancellor, UMass Amherst
J. Keith Motley, PhD (Boston College), Chancellor, UMass Boston
Divina Grossman, PhD (University of Pennsylvania), Chancellor, UMass Dartmouth
Martin T. Meehan, JD (Suffolk University), Chancellor, UMass Lowell
Michael F. Collins, MD (Tufts University), Chancellor, UMass Worcester and Senior Vice President for the Health Sciences
Marcellette G. Williams, PhD (Michigan State University), Senior Vice President for Academic and Student Affairs and International Relations
Christina M. Wilds, Senior Vice President for Administration, Finance and Technology and Treasurer
Thomas J. Chmura (Rensselaer Polytechnic Institute), Vice President for Economic Development Robert P. Connolly (Boston College), Vice President for Strategic Communications and University Spokesperson
Deirdre Heatwole, JD (New York Law School), General Counsel

UMass Worcester Administration

Michael F. Collins, MD (Tufts University), Chancellor Terence R. Flotte, MD (Louisiana State University), Executive Deputy Chancellor and Provost and Dean of the School of Medicine
Joyce A. Murphy, MPA (Harvard University), Executive Vice Chancellor, Commonwealth Medicine Robert E. Jenal, BS (University of Massachusetts Amherst), Vice Chancellor for Administration and Finance
Jennifer Berryman, Vice Chancellor for Communications
Charles J. Pagnam, MBA (Nichols College), Vice
Chancellor for Development
James Leary, JD (Georgetown University), Vice Chancellor for Community and Government Relations
Deborah L. Plummer, PhD (Kent State University), Vice Chancellor for Human Resources, Diversity and Inclusion
John Baker, MA (Purdue University), Associate Vice Chancellor for Facilities Management
Mark L. Shelton, MFA (University of Pittsburgh), Associate Vice Chancellor for Communications
Nancy Vasil, BS (Bentley College), Associate Vice Chancellor for Administration and Finance
Paulette Goeden, MBA (Florida International University), Assistant Vice Chancellor for Administration
Mark S. Klempner, MD (Cornell University) Executive Vice Chancellor, MassBiologics
James P. McNamara, PhD (University of Connecticut), Executive Director, Office of Technology Management
Gregory Wolf, BA (Cornell University), Chief Information Officer
Deborah Harmon Hines, PhD (University of Tennessee), Vice Provost for School Services
Luanne E. Thorndyke, MD (University of Nebraska), Vice Provost for Faculty Affairs
Katherine Ruiz deLuzuriaga, MD (Tufts University), Associate Provost for Global Health
Robert Milner, PhD (The Rockefeller University), Associate Provost for Professional Development
Judith K. Ockene, PhD (Boston College), Associate Provost for Faculty Affairs
Thorud Pederson, PhD (Union Institute), Associate Vice Provost for Research
Michele Pugnaire, MD, (McGill University), Sr. Associate Dean For Educational; Affairs
Michael D. Kneeland, MD, (Tuft University), Associate Dean for Allied Health and Interprofessional Education/Interim, Associate Dean of Student Affairs
Mary Zanetti, EdD (University of Massachusetts Amherst), Institutional Research Officer
Elaine R. Martin, DA (Simmons College), Director, Library Services

Graduate School of Nursing Administration

Paulette Seymour Route, PhD, RN (University of Massachusetts Amherst/Worcester), Dean
Janet Fraser Hale, PhD, RN, FNP (University of Maryland), Associate Dean for Academic Affairs
Kathleen Miller, EdD, APRN-BC, ACNP (Boston University), Associate Dean for Clinical Scholarship, Diversity and Evaluation
Karen Dick, PhD, GNP-BC, FAANP (University of Rhode Island), Associate Dean for Advanced Practice Programs
Graduate School of Nursing
Faculty

As of July 1, 2014
+ Joint appointment, primary faculty position is in the GSN
* Joint appointment, primary faculty position is in the School of Medicine
++ Full-time faculty

DEAN AND PROFESSOR
Paulette Seymour Route, BS, Worcester State, 1983; MS, Boston College, 1987; PhD, UMass Amherst/Worcester, 2001++

DEAN AND PROFESSOR EMERITUS
Lillian R. Goodman, BS, Boston, 1950; MS, 1954; EdD, 1969

ASSOCIATE DEANS AND PROFESSORS
Associate Dean for Academic Affairs, Director of Interprofessional and Community Partnerships Janet Fraser Hale, BS, Russell Sage, 1968; MA, Central Michigan, 1978; MS, Alaska, 1983; PhD, Maryland, 1987++

Associate Dean for Clinical Scholarship, Diversity and Evaluation
Kathleen H. Miller, BSN, San Jose State, 1975; MS, Boston College, 1980; EdD, Boston, 1989 ++

Associate Dean Advanced Practice Programs
Karen Dick, BSN, Southeastern MA University, 1976; MSN, Boston University, 1982; PhD, University of Rhode Island, 1998++

PROFESSOR EMERITUS
Mary K. Alexander, BS, Vermont, 1971; MS, UMass Amherst, 1974; EdD, 1985 Anne M. Bourgeois, BS, Worcester State, 1977; MEd, 1980; MSN, Anna Maria College, 1984; EdD, UMass Amherst, 1991

PROFESSORS
*Robert A. Baldor, BS, Vermont, 1977; MD, 1983
++Carol A. Bova, BSN, Salem State, 1979; MS, UMass Worcester, 1988; PhD, Boston College, 1998++
*Suzanne B. Cashman, BA, Tufts, 1969; MS, Cornell, 1974; ScD, Harvard, 1980
*Sybil L. Crawford, BS, Carnegie Mellon, 1983; MS, 1985; PhD, 1988
++James A. Fain, BSN, Rhode Island, 1976; MSN, Alabama/Birmingham, 1979; PhD, Connecticut, 1985
*Richard S. Irwin, BS, Tufts, 1964; MD, 1968
Lori Pbert, BA, University of Connecticut, 1982; MA, West Virginia University, 1985; PhD, West Virginia University, 1988
Deborah L. Plummer, BA, Notre Dame, 1974; MEd, Kent State University, 1985; PhD, Kent State University, 1987
Susan Sullivan-Bolyai, BSN, Metropolitan State, 1976; MN, Emory, 1978; DNSc, Yale, 1999
*Robert Weinstein, AB, Brandeis University, 1971; MD, New York University School of Medicine, 1975

ASSOCIATE PROFESSORS
Frank J. Domino, BA, Drew, 1982; MD, Texas, 1988
*Omanand Kouli, BSc, Jammu and Kashmir, 1966; MSc, Banaras Hindu, 1968; PhD, 1974++
Nancy Schappler Morris, BS, Salve Regina, 1980; MSN, Boston College, 1986; PhD, 1997 ++
*Sarah M. McGee, BS, Villanova, 1979; MD, New York Medical, 1983; MPH, St. Louis, 1990
Katharine K. O’Dell, BA, Graceland College, 1996; MSN, Case Western Reserve, 1997; PhD, UMass Worcester, 2006
Ruth M. Remington, BS, Rutgers, 1972; MS, UMass Worcester, 1992; PhD, UMass Amherst/Worcester, 1999
Rosemary T. Theroux, BS, Worcester State,
1986; MS, Boston College, 1986; PhD, UMass Amherst/Worcester, 2000
*David A. Wilner, BS, Tufts, 1975; MD, 1979

ASSISTANT PROFESSORS

Margaret Ackerman, BSN, Salem State, 1978; MSN, Hunter-Bellevue, 1987; DNP, MGH Institute of Health Professions, 2009
Traci L. Alberti, BSN, Fitchburg State, 1991, MS, UMass Lowell, 1999; PhD, UMass Lowell 2014++
Asdigha, Mehran Nesari, PharmD, Florida Agricultural & Mechanical University, 1991
Jayde L. Bednarik, PharmD, Northeastern University, 2008
Allison Blodgett, BA, University of New Hampshire, 1992; MA, The Ohio State University, 1998; PhD, 2004
Jean E. Boucher, BS, Fitchburg State, 1983; MS, Boston College, 1987; PhD, UMass Amherst/Worcester, 2002++
Elaine L. Bridge, BS, University of Rhode Island, 1978; MS, Framingham State, 1998; DNP, MGH, 2011
Geoffrey Burns, BA, Brown, 1990: MA, Boston University, 1991; MD, Boston University, 1996
Sean Collins, BS, UMass Amherst, 1990; MS, UMass Worcester, 1994; PhD, 2009
Lisa M. Colombo, BS, Worcester State College, 1997; MHA, Clark, 1993; DNP, MGS Institute of Health Professions, 2009
Melinda Darrigo, BS, Salem State, 1991; MS, UMass Worcester, 2003; PhD, 2009
Mary A. Fierro, BA, Seton Hall University, 72; MS, Rutgers University, 1988; PhD, Temple University, 2000
Gayle L. Gravlin, BSN, Boston College, 1978; MSN, Yale, 1984; EdD, Columbia, 1994
Thomas Groblewski, BS, UMass Amherst, 1980; DO, University of New England, 1995
Michelle Harwick, BSN, UMass Lowell, 1983; MSN, Arizona, 1988; DNP, UMass Amherst, 2010
Judy L. Jones, BS, UMass Amherst, 1998; MS, 2000; DNP, 2012
Cheryl Greer Jordan, BS, University of Detroit, 1986; MS, University of Michigan, 1990, PhD, Case Western Reserve University, 2009
Anne T. Kane, BS, Boston College, 1975; MS, 1977; PhD, 1999
Judith Kenary, BSN, Pace, 1976; MBA, Anna Maria College, 1996; EdD, University of Hartford, 2010 Sun Seog Kim, BS, Seoul National, 1984; MS, Rutgers, 1995; PhD, 2002
Robin T. Klar, BSN, Fitchburg State, 1979; MSN, Boston College, 1980; DNSc, Yale, 2002++
*Sheila B. Noone, BS, Worcester State, 1984; MPH, Boston, 1986; PhD, Union, 2000
Kenneth S. Peterson, BS, UMass Amherst, 1989; MS, UMass Amherst, 1994; MA, Brandeis 2005;
PhD, 2009++
Mary T. Reed, BSN, Worcester State College, 1985; MSN, UMass Worcester, 1997; PhD, UMass
Worcester, 2005
Pamela M. Senesac, BS, Georgetown, 1972; MS, Boston, 1974; MS, Harvard, 1981; PhD, Boston College, 2004
Shirley A. Shea, BSN, University of Washington, 1979; MSN, University of Washington, 1981, JD, Syracuse University, 1990
Kimberly N. Silver, BSN, Atlantic Union, 2001, MSN, Regis College, 2004; DNP, Regis College, 2011 ++
Brian R. Skirvin-LeClair, BSN, Fitchburg State University, 1999; MSN, Simmons College, 2002; DNP, Regis College, 2011
Brian S. Smith, BS, Massachusetts College of Pharmacy & Health Sciences, 1997; PharmD, 1999
Mary E. Sullivan, BSN, Fitchburg State, 1976; MS, UMass Worcester, 1984; DNP, 2010
Mathew Taylor, BS, Medical College of Georgia, 1990; DPT, MGH Institute of Health Professions, 2005
Jill M. Terrien, BSN, Rhode Island College, 1982; MS, UMass Worcester, 1997; PhD, 2007++
Eileen Terrill, BS, Worcester State, 1998; MS, UMass Worcester, 2000; PhD, 2007++
Shirley J. Tierney, BSN, Fitchburg State, 1982; MSN, Anna Maria College, 1984; PhD, UMass Worcester, 2010
Maureen E. Wassef, BSN, Connecticut, 1984; MSN, Southern Connecticut State, 1989; PhD, UMass Amherst/Worcester, 2004++
Dinesh Yogaratnam, PharmD, Rhode Island, 2002
Terri LaCoursiere Zuccheri, BSN, The Catholic University of America, 1992; MSN, Emory University, 1995; PhD, University of Hawaii at Manoa, 2012
