

## **ArcGIS Desktop Installation Instructions**

**1. Map a network drive to \\edunivapps54\ArcGis**

- Open *My Computer*.
- On the **Tools** menu, click **Map Network Drive**.
- In Drive, select an unused drive letter (one will be suggested usually Z:)
- In **Folder**, type the ArcGIS server and share name: \\edunivapps54\ArcGis
- Make sure the box labeled **Reconnect at login** is checked

**2. Once the drive is mapped from "my computer" navigate to that drive and go to this directory:**

**ArcGIS\_Install\_Desktop/documentation/install\_guides/ArcGIS\_Desktop/**

**3. Click on the file in that directory named     **setup.exe****

**4. When the installation starts, **follow the instructions on your screen.****

After installation, the ArcGIS applications can be accessed from the Start button by navigating to the ArcGIS program group:

**Start > Programs > ArcGIS**
