

Skin diseases research

Principal Investigator: John E. Harris, MD, PhD

Study Location: UMass Memorial Medical Center in Worcester, MA

If you have a skin disease and would be interested in participating in research to help us learn more about the disease and find new treatments, please consider the opportunity below:

Donating skin and blood – If you have a skin disease, you may qualify to participate in a study where we will take several small pieces of skin and a blood sample for study. The one visit for this study will be in the Clinical Trials Unit on the University Campus, 55 Lake Avenue North, Worcester. Appointment will be scheduled according to your availability.

We are currently looking for patients with:

Vitiligo

Lupus

Psoriasis

And many other skin conditions

There are no costs to you from being in the study. Compensation will be provided as outlined in the consent form. If you are interested in participating, please ask your doctor for an information sheet, or contact:

Zainab Abbas, MD

Clinical Research Fellow
