#### FCE DESCRIPTION

This is a one week course in musculoskeletal imaging intended for medical students interested in exploring imaging and image guided interventions of the musculoskeletal system. Students will be exposed to a wide variety of musculoskeletal conditions including: rheumatologic disease, tumors, trauma and sports related injuries.

#### FCE LEARNING OBJECTIVES

By the end of this session students will

- Describe the different imaging modalities and techniques utilized in the work up of musculoskeletal diseases.
- Describe common contraindications and limitations for various imaging studies utilized in the diagnosis and imaging
- Demonstrate familiarity of radiographic manifestations of common musculoskeletal pathologies.

UMMS Competencies Communicator | Problem Solver | Professional  
Inter-professional no  
Interdisciplinary no  
Evaluation Type Attendance | Effort | Participation  
Evaluation Criterion Clinical Skills
