Breif description (200 words or less of course details):

The Healer’s Art course enables the formation of a genuine community of inquiry between students and physicians that encourages an in-depth sharing of experience, beliefs, aspirations and personal truths. Students and faculty participate together in a discovery model that transcends the divisiveness of expertise to explore service as a way of life. The process-based curriculum takes a highly innovative, interactive, contemplative and didactic approach to enabling students to uncover and recognize the personal and universal meaning in the daily work of medicine.

Semester offered: Spring

Registration information:

http://www.ishiprograms.org/programs/medical-educators-students/course-description/
