LGBTQA Health Education – OE 945

Brief description (200 words or less of course details):

Every physician will encounter an LGBTA patient at some point during their career. This course seeks to educate UMass Medical Students on how to provide appropriate and sensitive care to LGBTA patients in order to make health care services more welcoming to all. Students will be provided the knowledge needed to feel comfortable and confident in their future care for patients within the LGBTA community. By bringing the experiences of medical professionals who have worked specifically with the LGBTA population to UMass Medical, students will come to better understand the unique needs and difficulties faced by the LGBTA population in seeking out and obtaining care.

Semester offered: Fall

Registration information:

Requirements for credit:

Attend 5 out of 6 sessions. If student(s) attends only 4 sessions, then they must write a one-page reflection on a topic of one of the sessions they missed
