Psychiatry: Defining the Mind – OE 968

Brief description (200 words or less of course details):

This Optional Enrichment Elective (OEE) will serve as an opportunity for students to:

- Garner a deeper understanding and appreciation for psychiatry, a burgeoning and rapidly developing frontier of medicine.
- Become equipped with clinically applicable tools in establishing relationships with patients suffering from psychiatric illness.

Semester offered: Fall

Registration information: Contact student leaders below

Requirements for credit:

- Attendance - students will be required to attend a minimum of five total sessions throughout the semester.
- Pre-course survey - students will be required to fill out a survey at the start of the course. The survey will assess the knowledge/information gap that exists in the first and second year student body with respect to psychiatric management and treatment BEFORE completion of the elective.
- Post-course survey - students will be required to fill out a survey at the end of the course. This survey will assess how adequately the elective achieved its goals in educating students and stirring interest in the budding field of psychiatry.
- Post-course reflection - students will have a chance to reflect on the elective and what they took away from it.
