

# Global Health Topics in Action – OE 931

## Brief description (200 words or less of course details):

This student-led course introduces students to major global health topics and issues to increase their ability to navigate, advocate, and build awareness as future health professionals. Students are exposed to topics such as childhood illness, maternal mortality, HIV/AIDS, tuberculosis, chronic disease, and water and sanitation. They are encouraged to think critically on issues and themes in global health today including community-based approaches to global health and incorporation of evidence-based solutions to global health challenges.

Semester offered: Fall

## Registration information:

For further information, please contact the student leaders of the Global Health Topics in Action Optional Enrichment Elective (OEE).

## Requirements for credit:

Required attendance at 7/10 sessions around global health topics, including but not limited to research, global health experiences or careers, and refugee health. The student may also attend various events related to global health.

The student will also complete a written reflection discussing their experience at the end of the OEE.
