Naloxone HCl 1 mg/mL
2 x 2 mL as pre-filled Luer-Lock needless syringe
(NDC 76329-3369-1)

Refills: _____
2 x Intranasal Mucosal Atomizing Device (MAD 300)
Refills: _____

For suspected opioid overdose, spray 1mL in each nostril. Repeat after 3 minutes if no or minimal response.

Pharmacist: Call 1-800-788-7999 to order MAD 300.

Are they breathing? → Call 911 for help

- Slow or shallow breathing
- Gasping for air when sleeping or weird snoring
- Pale or bluish skin
- Slow heartbeat, low blood pressure
- Won't wake up or respond (rub knuckles on sternum)

Airway
Make sure nothing is inside the person’s mouth.

Prepare Naloxone
Are they any better? Can you get naloxone and prepare it quickly enough that they won’t go for too long without your breathing assistance?

Rescue breathing
Oxygen saves lives. Breathe for them.
One hand on chin, tilt head back, pinch nose closed.
Make a seal over mouth & breathe in
1 breath every 5 seconds
Chest should rise, not stomach

Evaluate + support
- Continue rescue breathing
- Give another 2 sprays of naloxone in 3 minutes if no or minimal breathing or responsiveness
- Naloxone wears off in 30-90 minutes
- Comfort them; withdrawal can be unpleasant
- Get them medical care and help them not use more opiate right away
- Encourage survivors to seek treatment if they feel they have a problem
