

Brooks Thompson, B.A.
Clinical Research Coordinator

Brooks has worked for UMass Medical School for twenty years. He spent eighteen years studying stimulus control, equivalence class relations, and behavioral momentum theory at the E.K. Shriver Center. Currently, Brooks serves as a Research Coordinator and manages a grant through the Executive Office of the Trial Court that provides MISSION services to Drug Treatment Court participants, and a grant aimed at developing an online training course for the MISSION Model. Brooks' research interests are in machine and distance learning technologies.
