## TurningPoint 5 Polling Technology

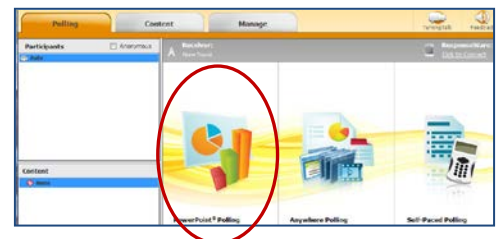

### Creating an Interactive Presentation with Version 5

Interactive PowerPoint presentations created with the **TurningPoint 2008** version are compatible with **TurningPoint 5**. Your presentation will work as expected when launched in Version 5. This document guides the user through creating a new presentation or adding slides to an existing one. While there are several variations to creating one slide, this document does not explore all items in drop down menus. It is meant as a simple guide for you to get started.

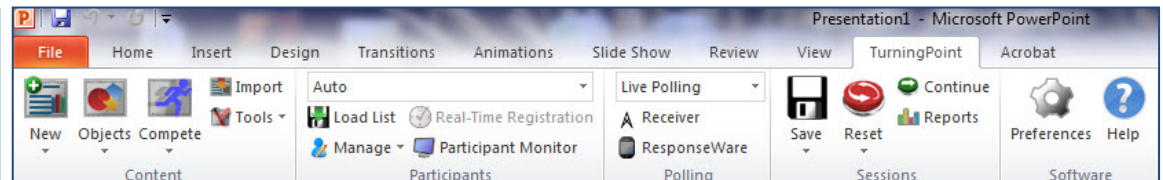

1. Open **TurningPoint 5** on the Desktop.

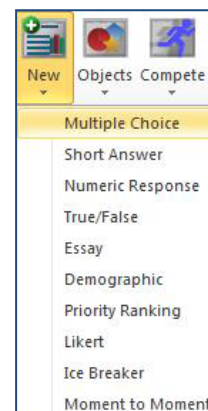

2. The TurningPoint dashboard appears. Click **PowerPoint Polling**.

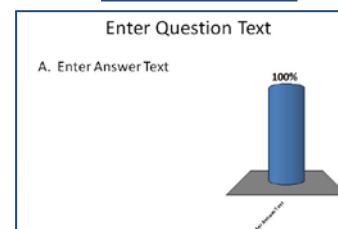

Here's a look at  
the TP ribbon.

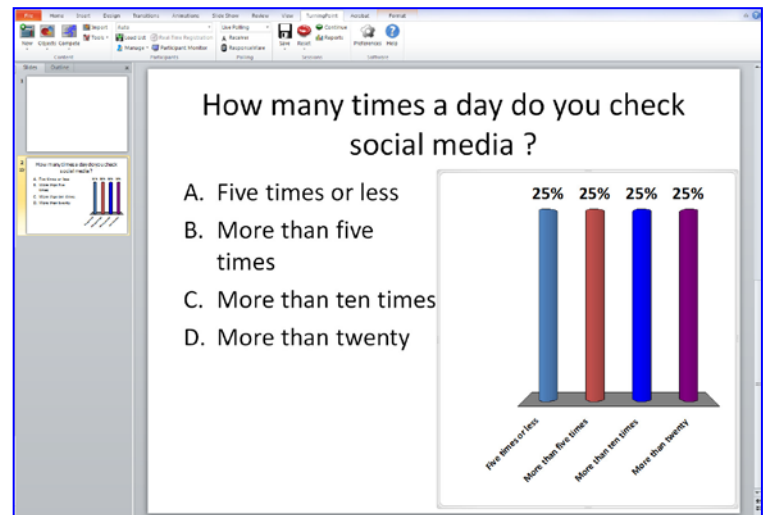

3. Click **New** and choose a question type from the dropdown menu.

4. Highlight **Enter Question Text** and type your question text.  
The highlighted area will disappear when you begin typing.

5. As above, highlight **Enter Answer Text** and start typing your first possible answer. Just click **Enter** to add more answers, adding no more than ten possible answers. Click just outside of the question box to update the grid.

## Slide Preferences

### Question Options

- **Anonymous:** Will not track participant information.
- **Bullet Format:** Change the long answers under the graph to A, B, C, D.
- **Multiple Responses:** Check if more than one answer is applicable. When this box is checked the following options may be set: Number of Responses, Allow Duplicates and All or Nothing Scoring.

### Polling Options

- **Automatically Open Polling:** Polling opens when slide is shown. This is checked by default.
- **Show Results:** Two options are given: **After Polling** appears when you close the poll by clicking **Enter**. This box is checked by default. **During Polling** allows you to see dynamic polling as it happens; compatible with Office 2010.
- **First Response Only:** TurningPoint will only accept the first response sent by each participant.

### Scoring Options

- **Correct Point Value:** Set point value by entering number in box provided.
- **Incorrect Point Value:** Set point value by entering number in box provided.
- **Speed Scoring:** Point values will decrease relative to the time polling is kept open.
- **Show Advanced Scoring:** When selected, the slide becomes demographic. A demographic grouping must be assigned in the Preferences Panel.

In the grey section choose the correct answer. By clicking the action link to the right of **No Value** you can choose **Correct Answer** from the dropdown menu. Show the correct response on the polling slide by clicking Objects from the TurningPoint ribbon then **Correct Answer Indicator**.
